

INTERNETWORKING AND E-INFRASTRUCTURE AT NIKHEF

David Groep
Physics Data Processing group
September 2019

ATLAS

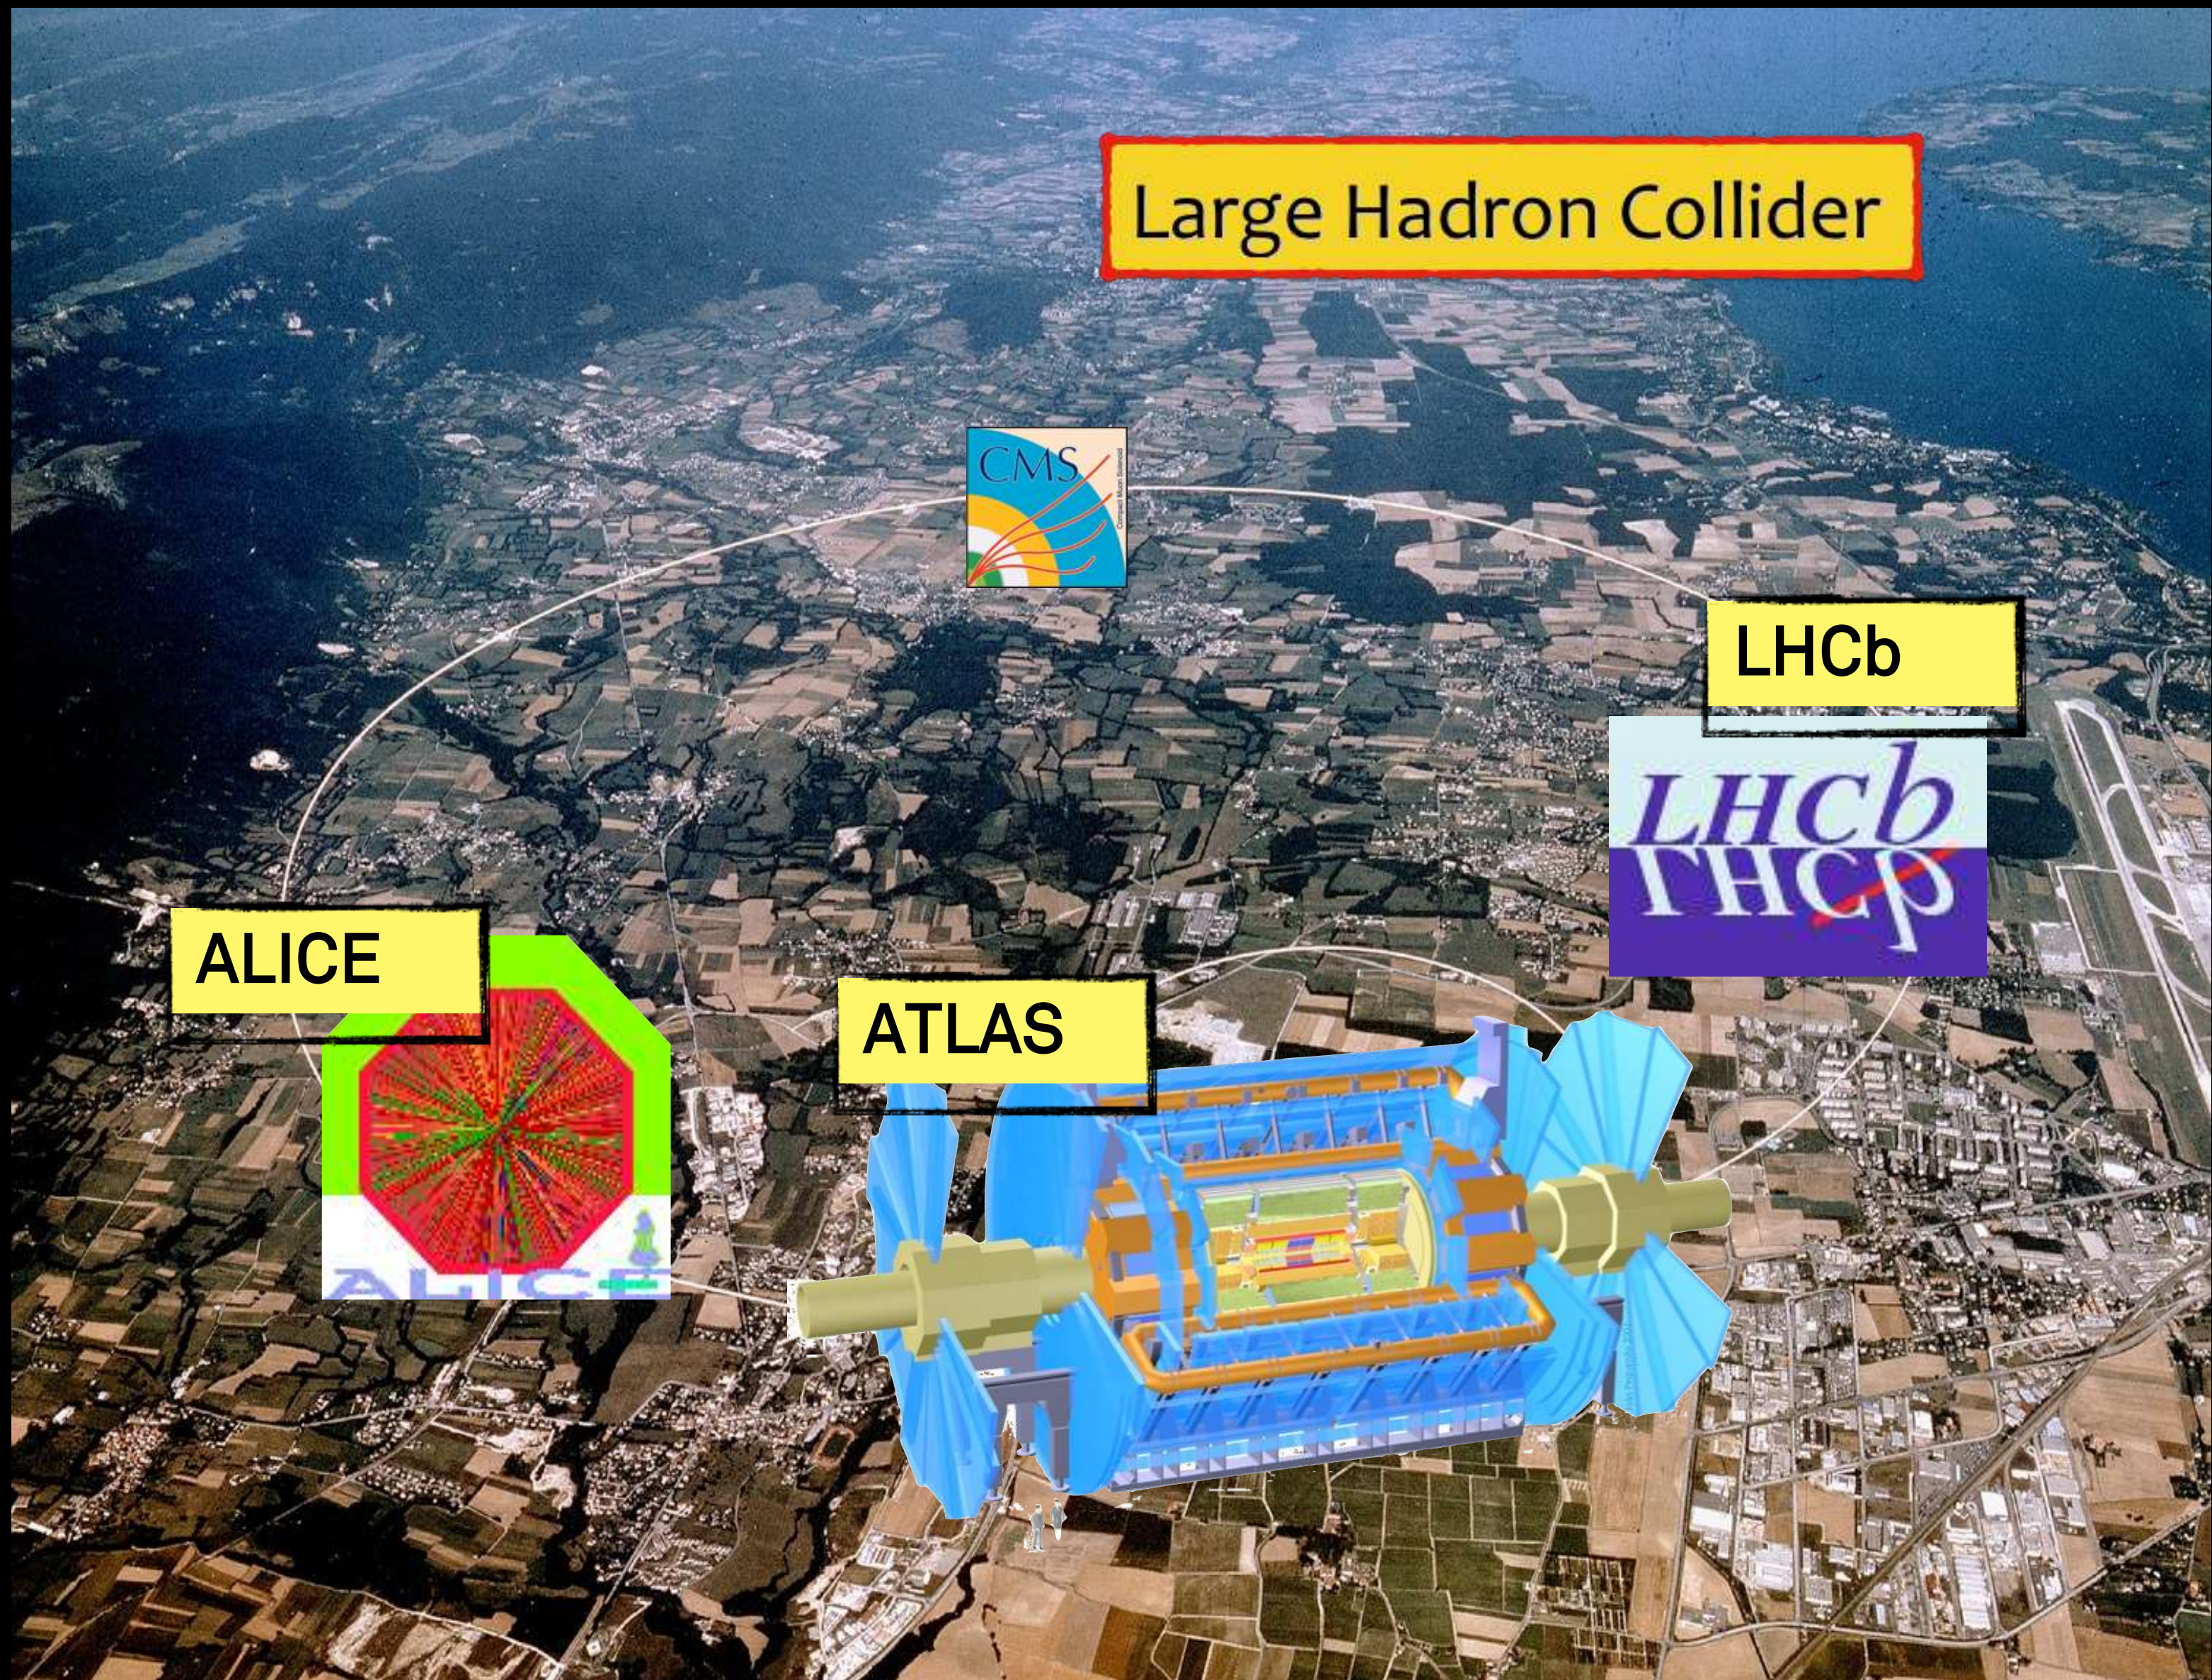

- *Higgs physics*
- Beyond the standard model

LHCb

- *rare decays*
- matter vs anti-matter

Alice

- *quark-gluon plasma*
- matter phase transitions

KM3NET

- neutrino telescope

Virgo/LIGO

- gravitational waves

Auger

- ultra-high energy cosmic rays

Xenon

- search for dark matter

Pierre Auger - cosmic rays

Xenon1T - Dark Matter

KM3NeT - neutrino detection

Adv VIRGO - Gravitational Waves

~ 10 seconds to compute a single event at ATLAS for 'jets' containing ~30 collisions

Display of a proton-proton collision event recorded by ATLAS on 3 June 2015, with the first LHC stable beams at a collision energy of 13 TeV

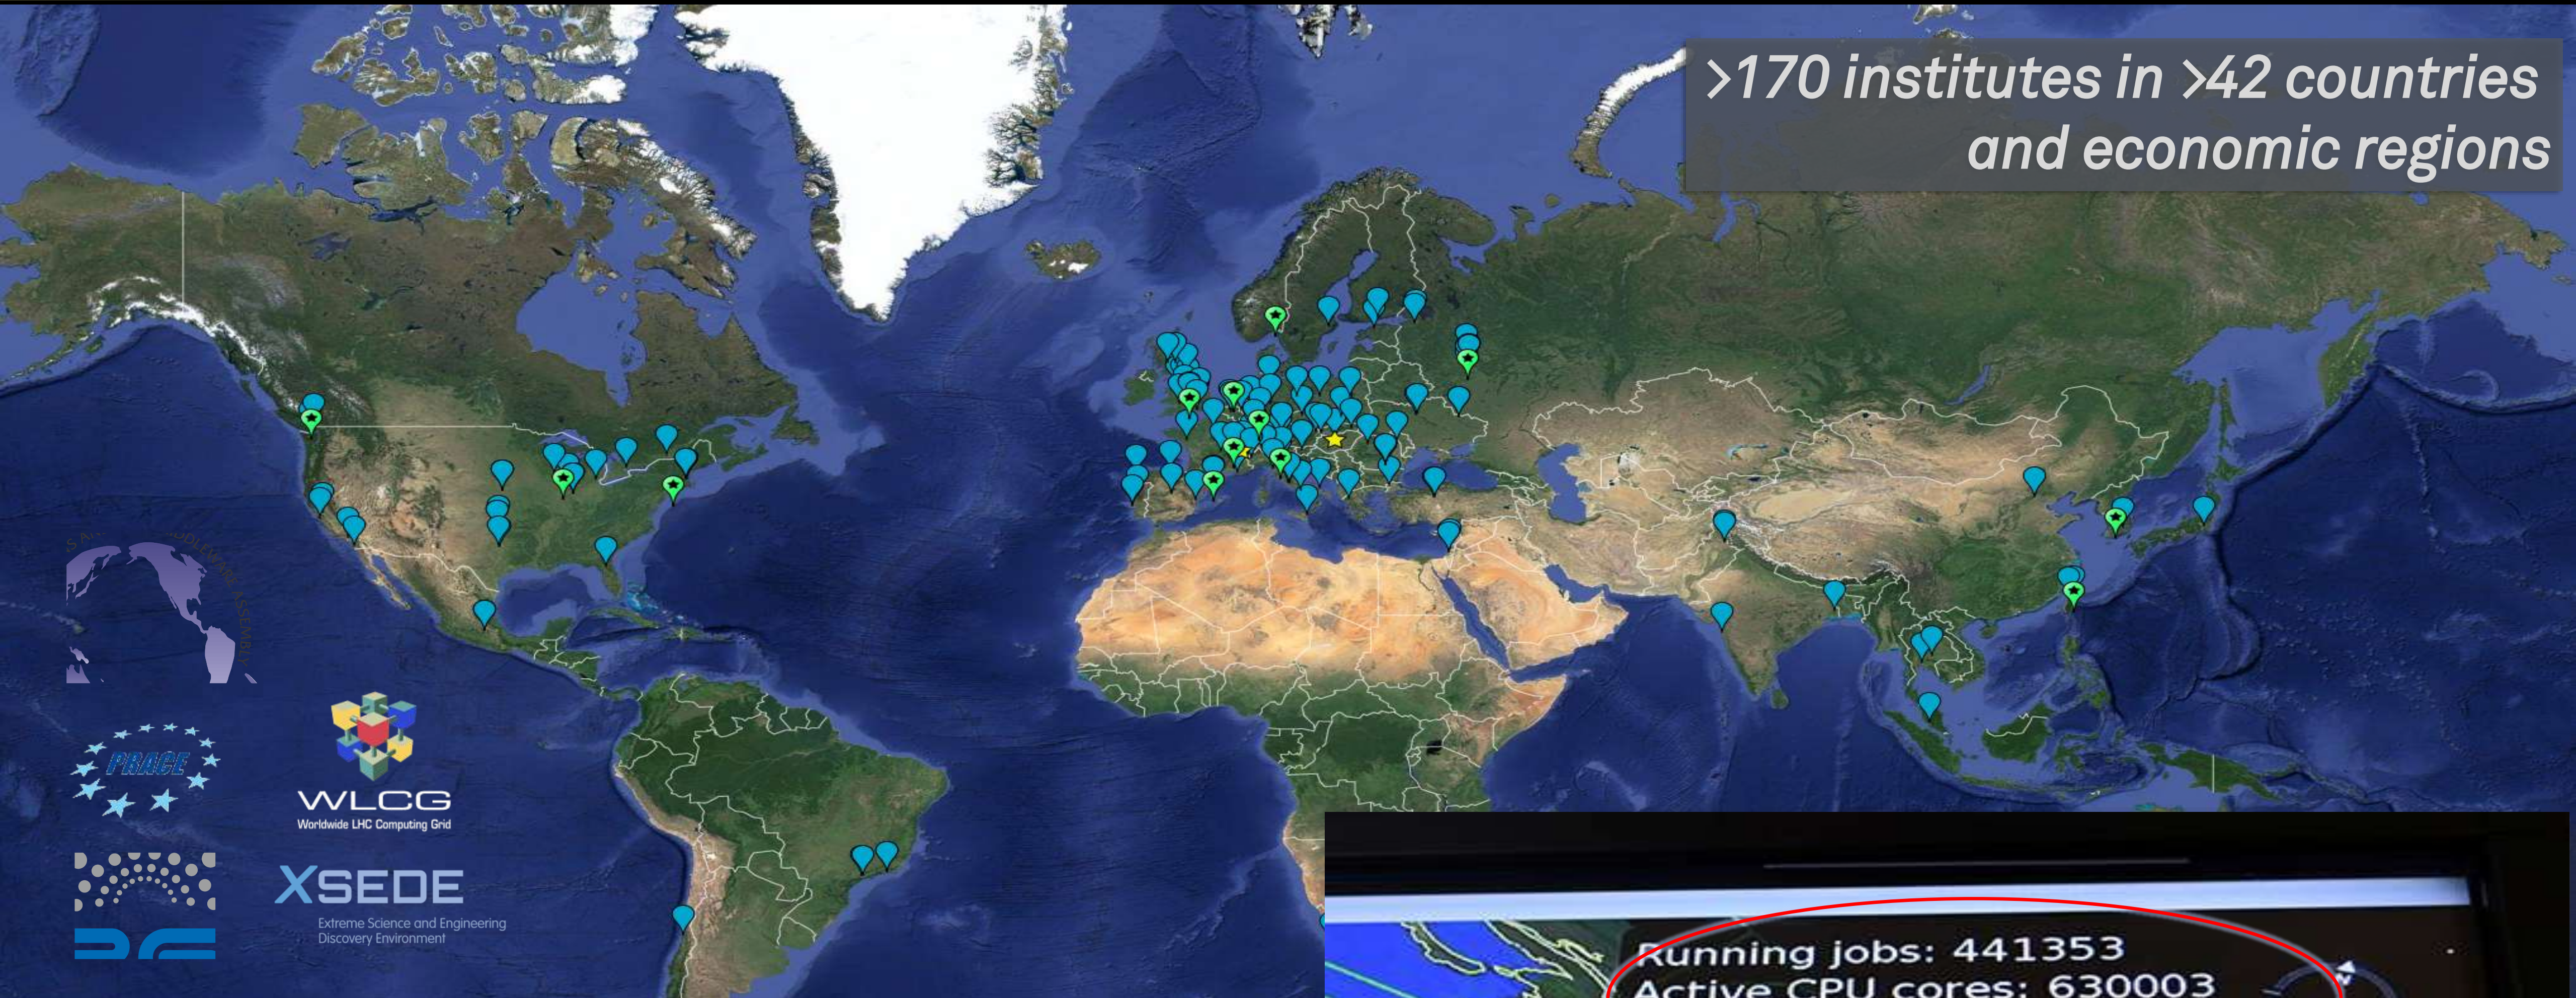

Event processing time: v19.0.1.1 as per Jovan Mitrevski and 2015 J. Phys.: Conf. Ser. 664 072034 (CHEP2015)

Network: from 9600bps to 1.2Tbps

top-left: Hayes smart PSTN modem, 1200-9600bps
bottom-right: Juniper QFX10k16, up to 28.8Tbps

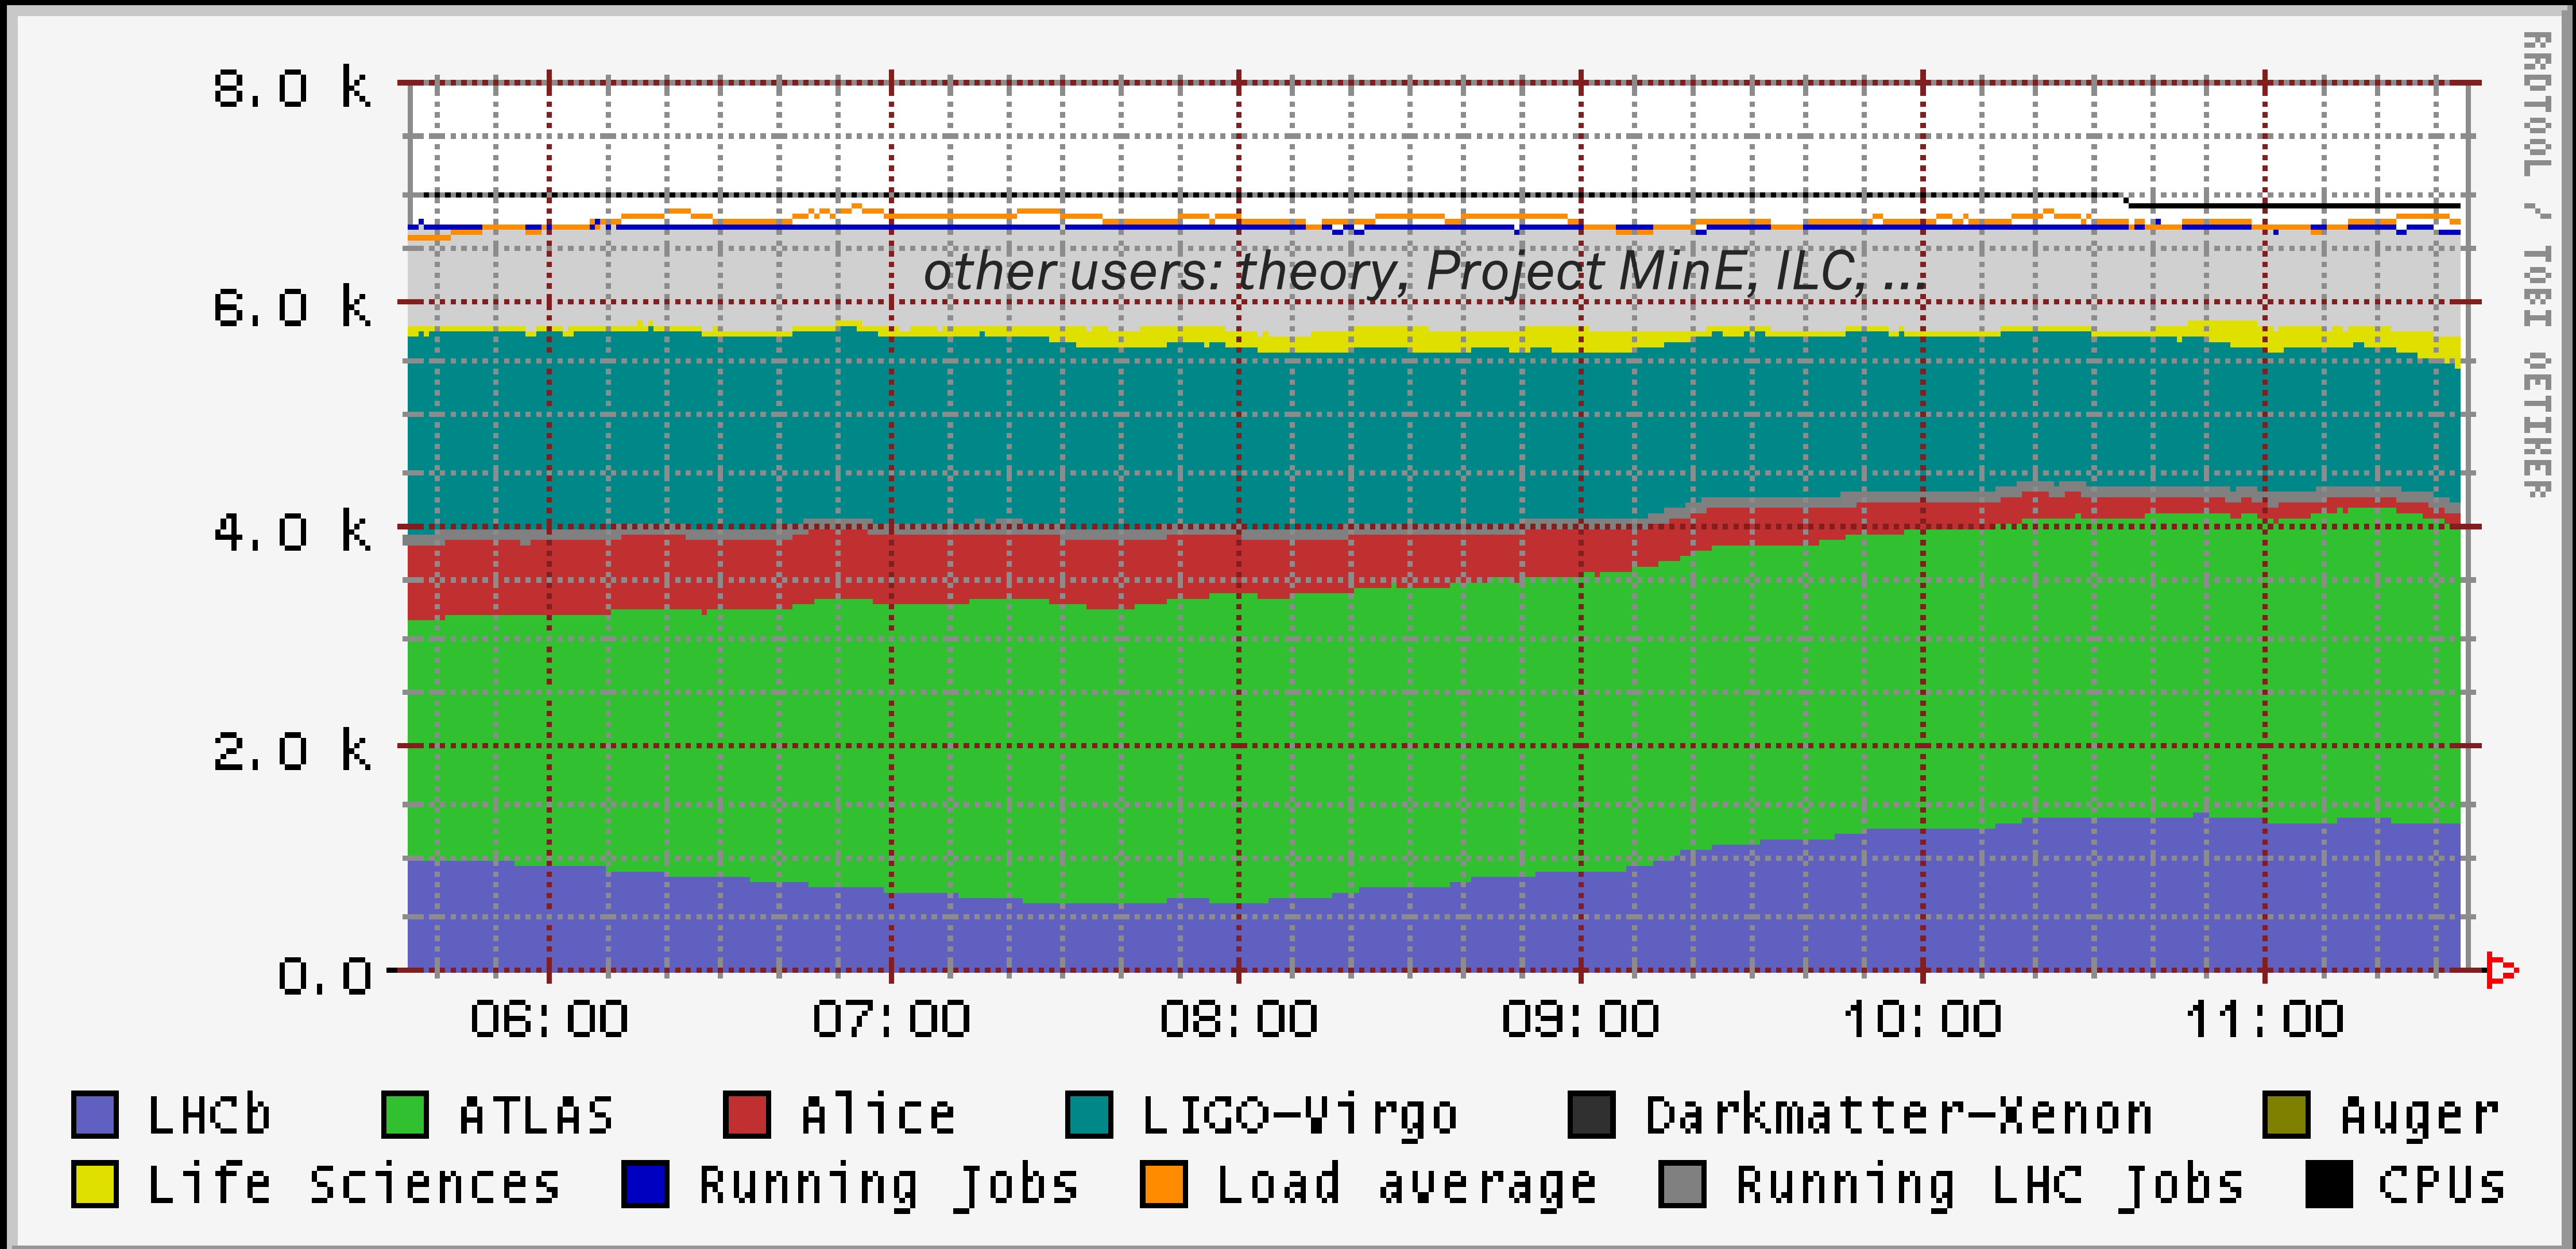

>170 institutes in >42 countries and economic regions

- *Computing* ~ 1,000,000 cores
- *On-line disks* > 310 PB
- *Archival* > 390 PB

Running jobs: 441353
 Active CPU cores: 630003
 Transfer rate: 35.32 GiB/sec

September 1985: Girotel

Humble beginnings: a direct circuit link from your MSX modem to the IBM system in Breda

Paradigm change: packet vs circuit-switched

THE ARPA NETWORK

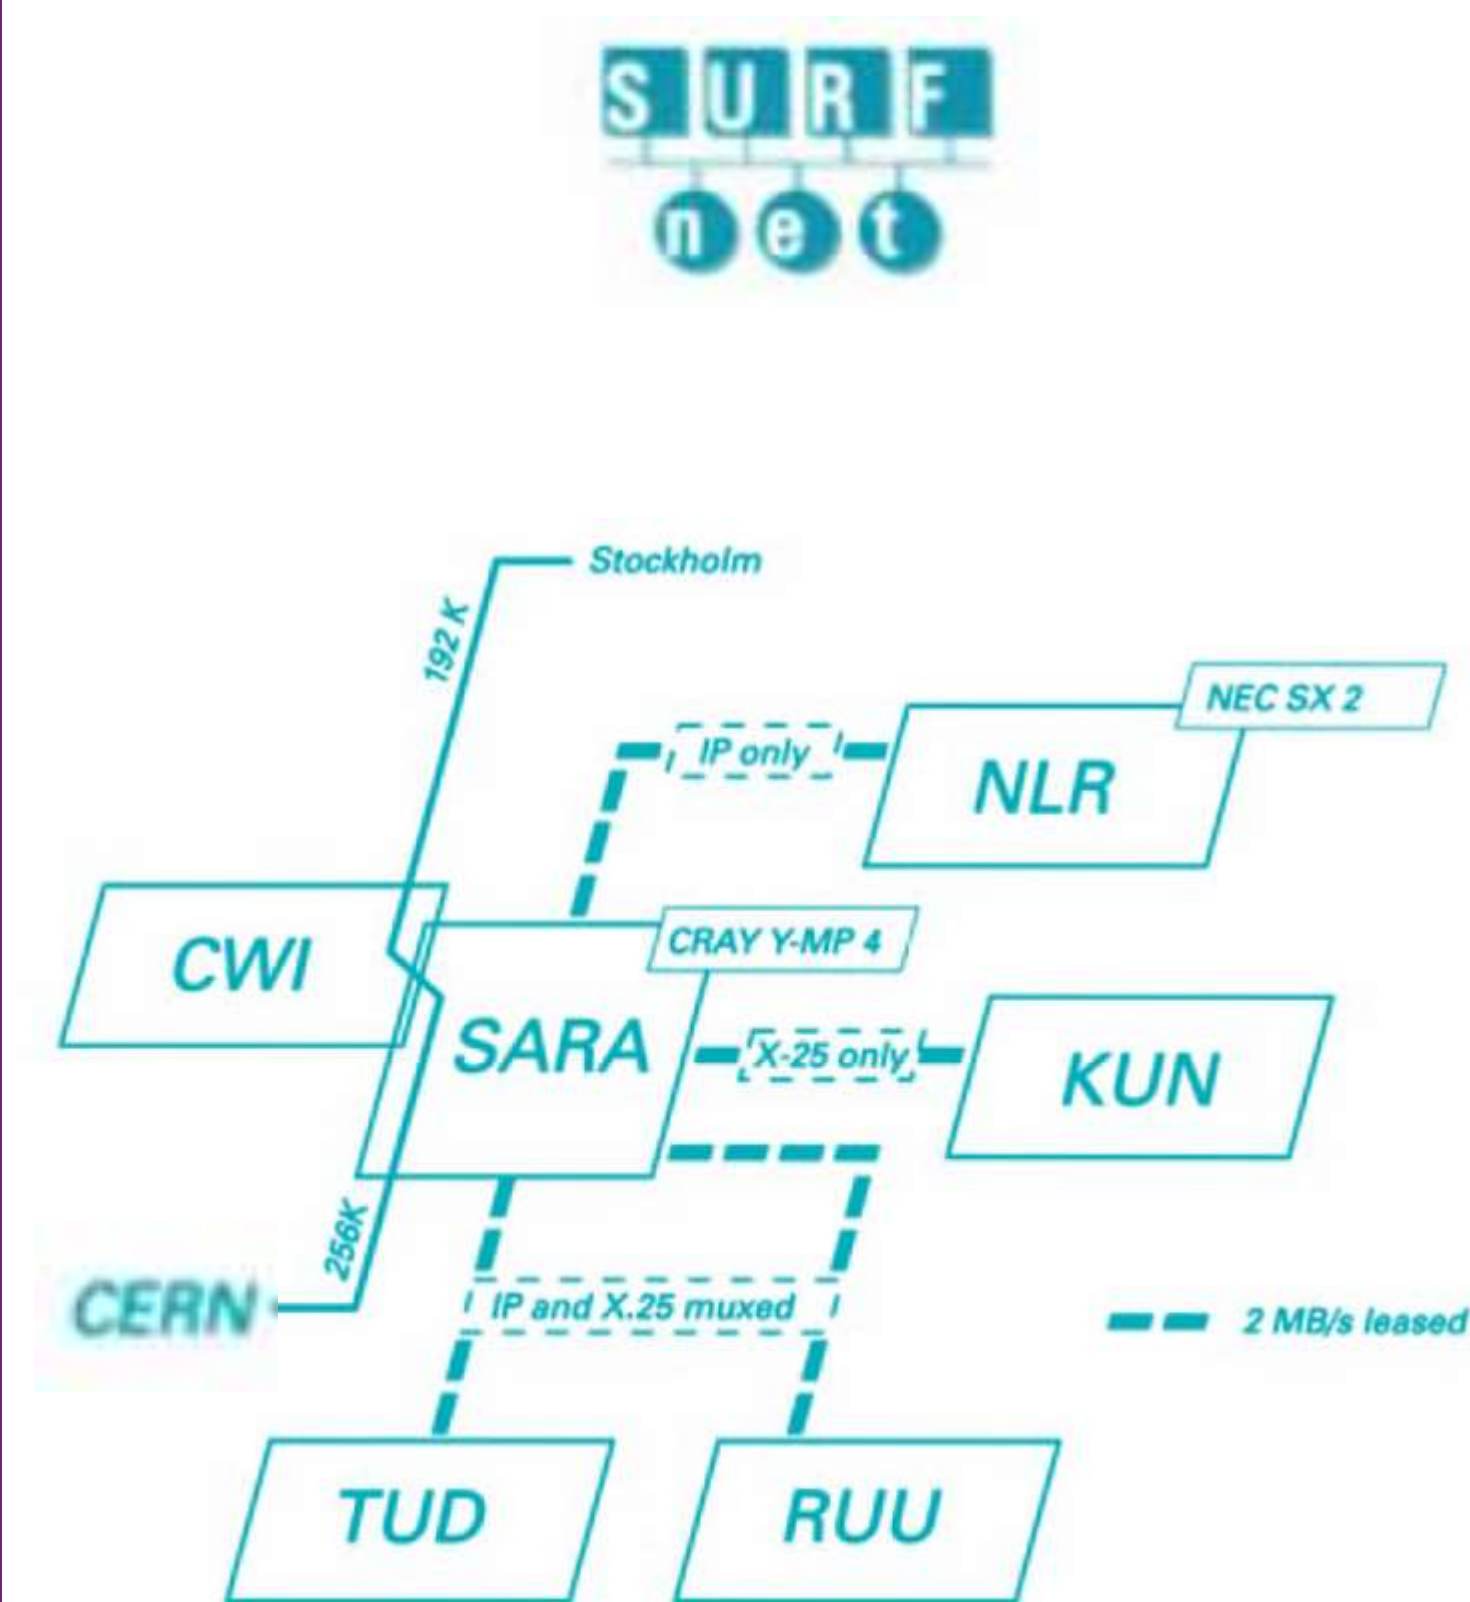

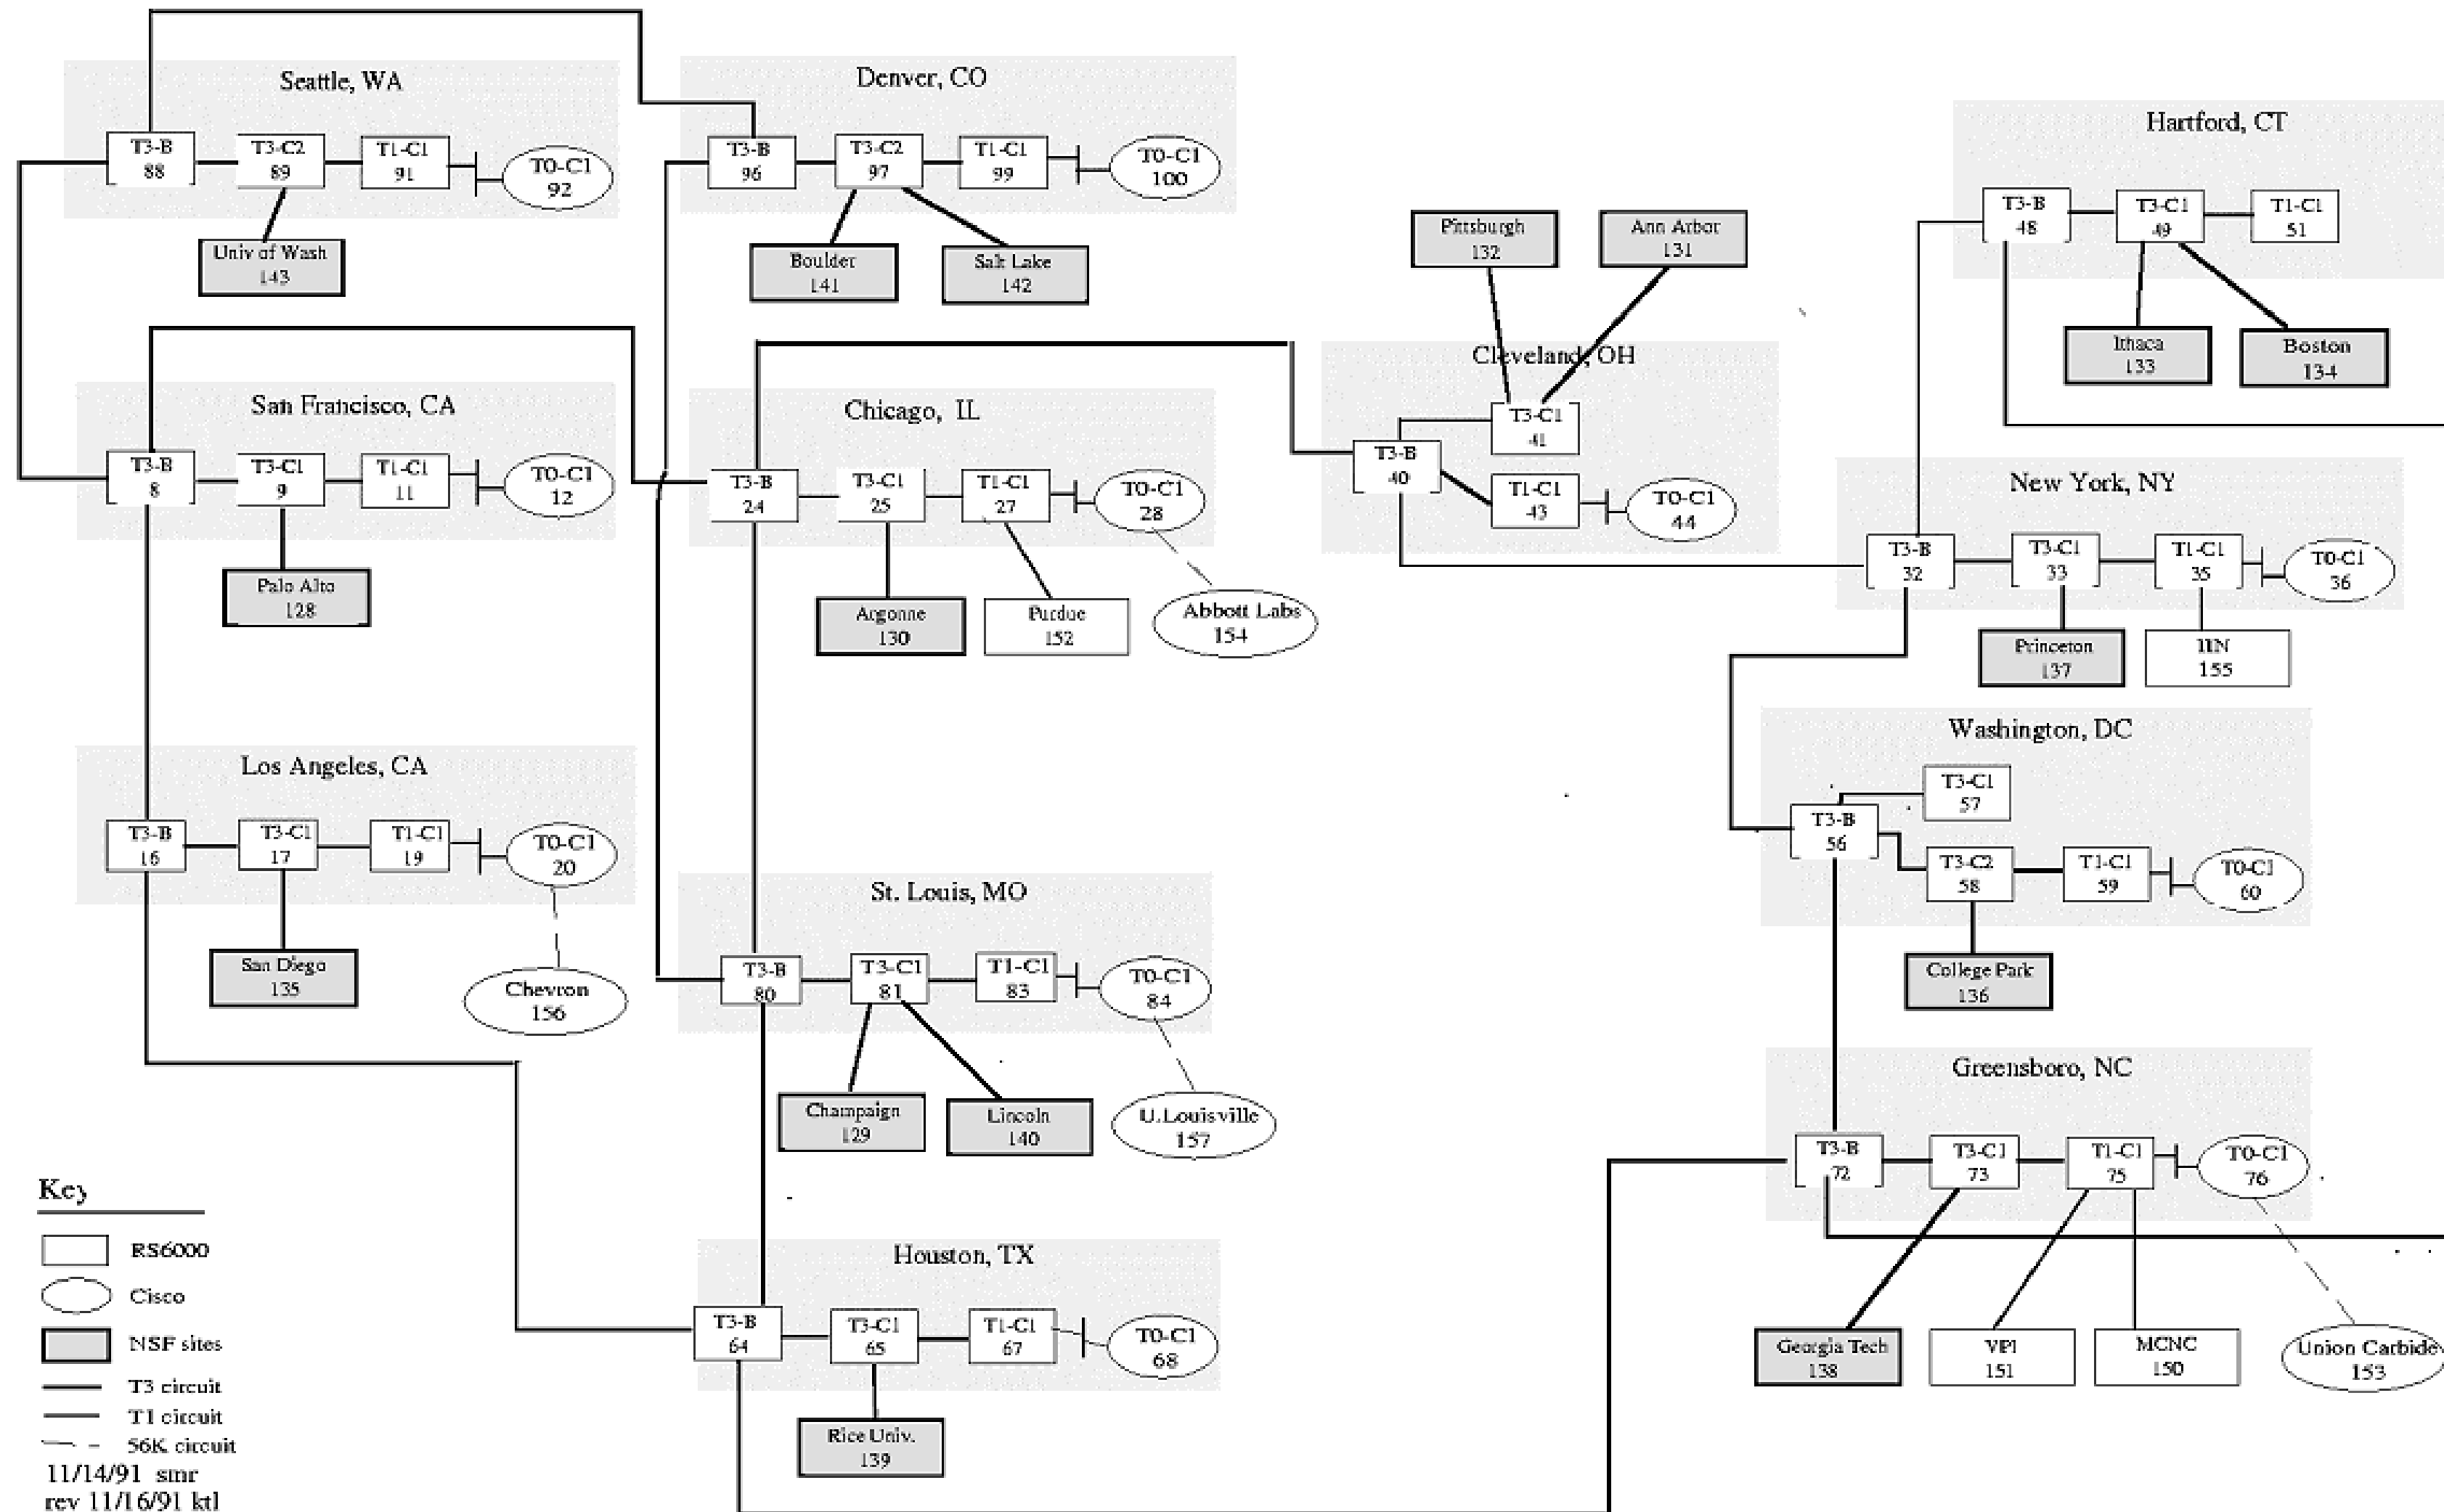

DEC 1969

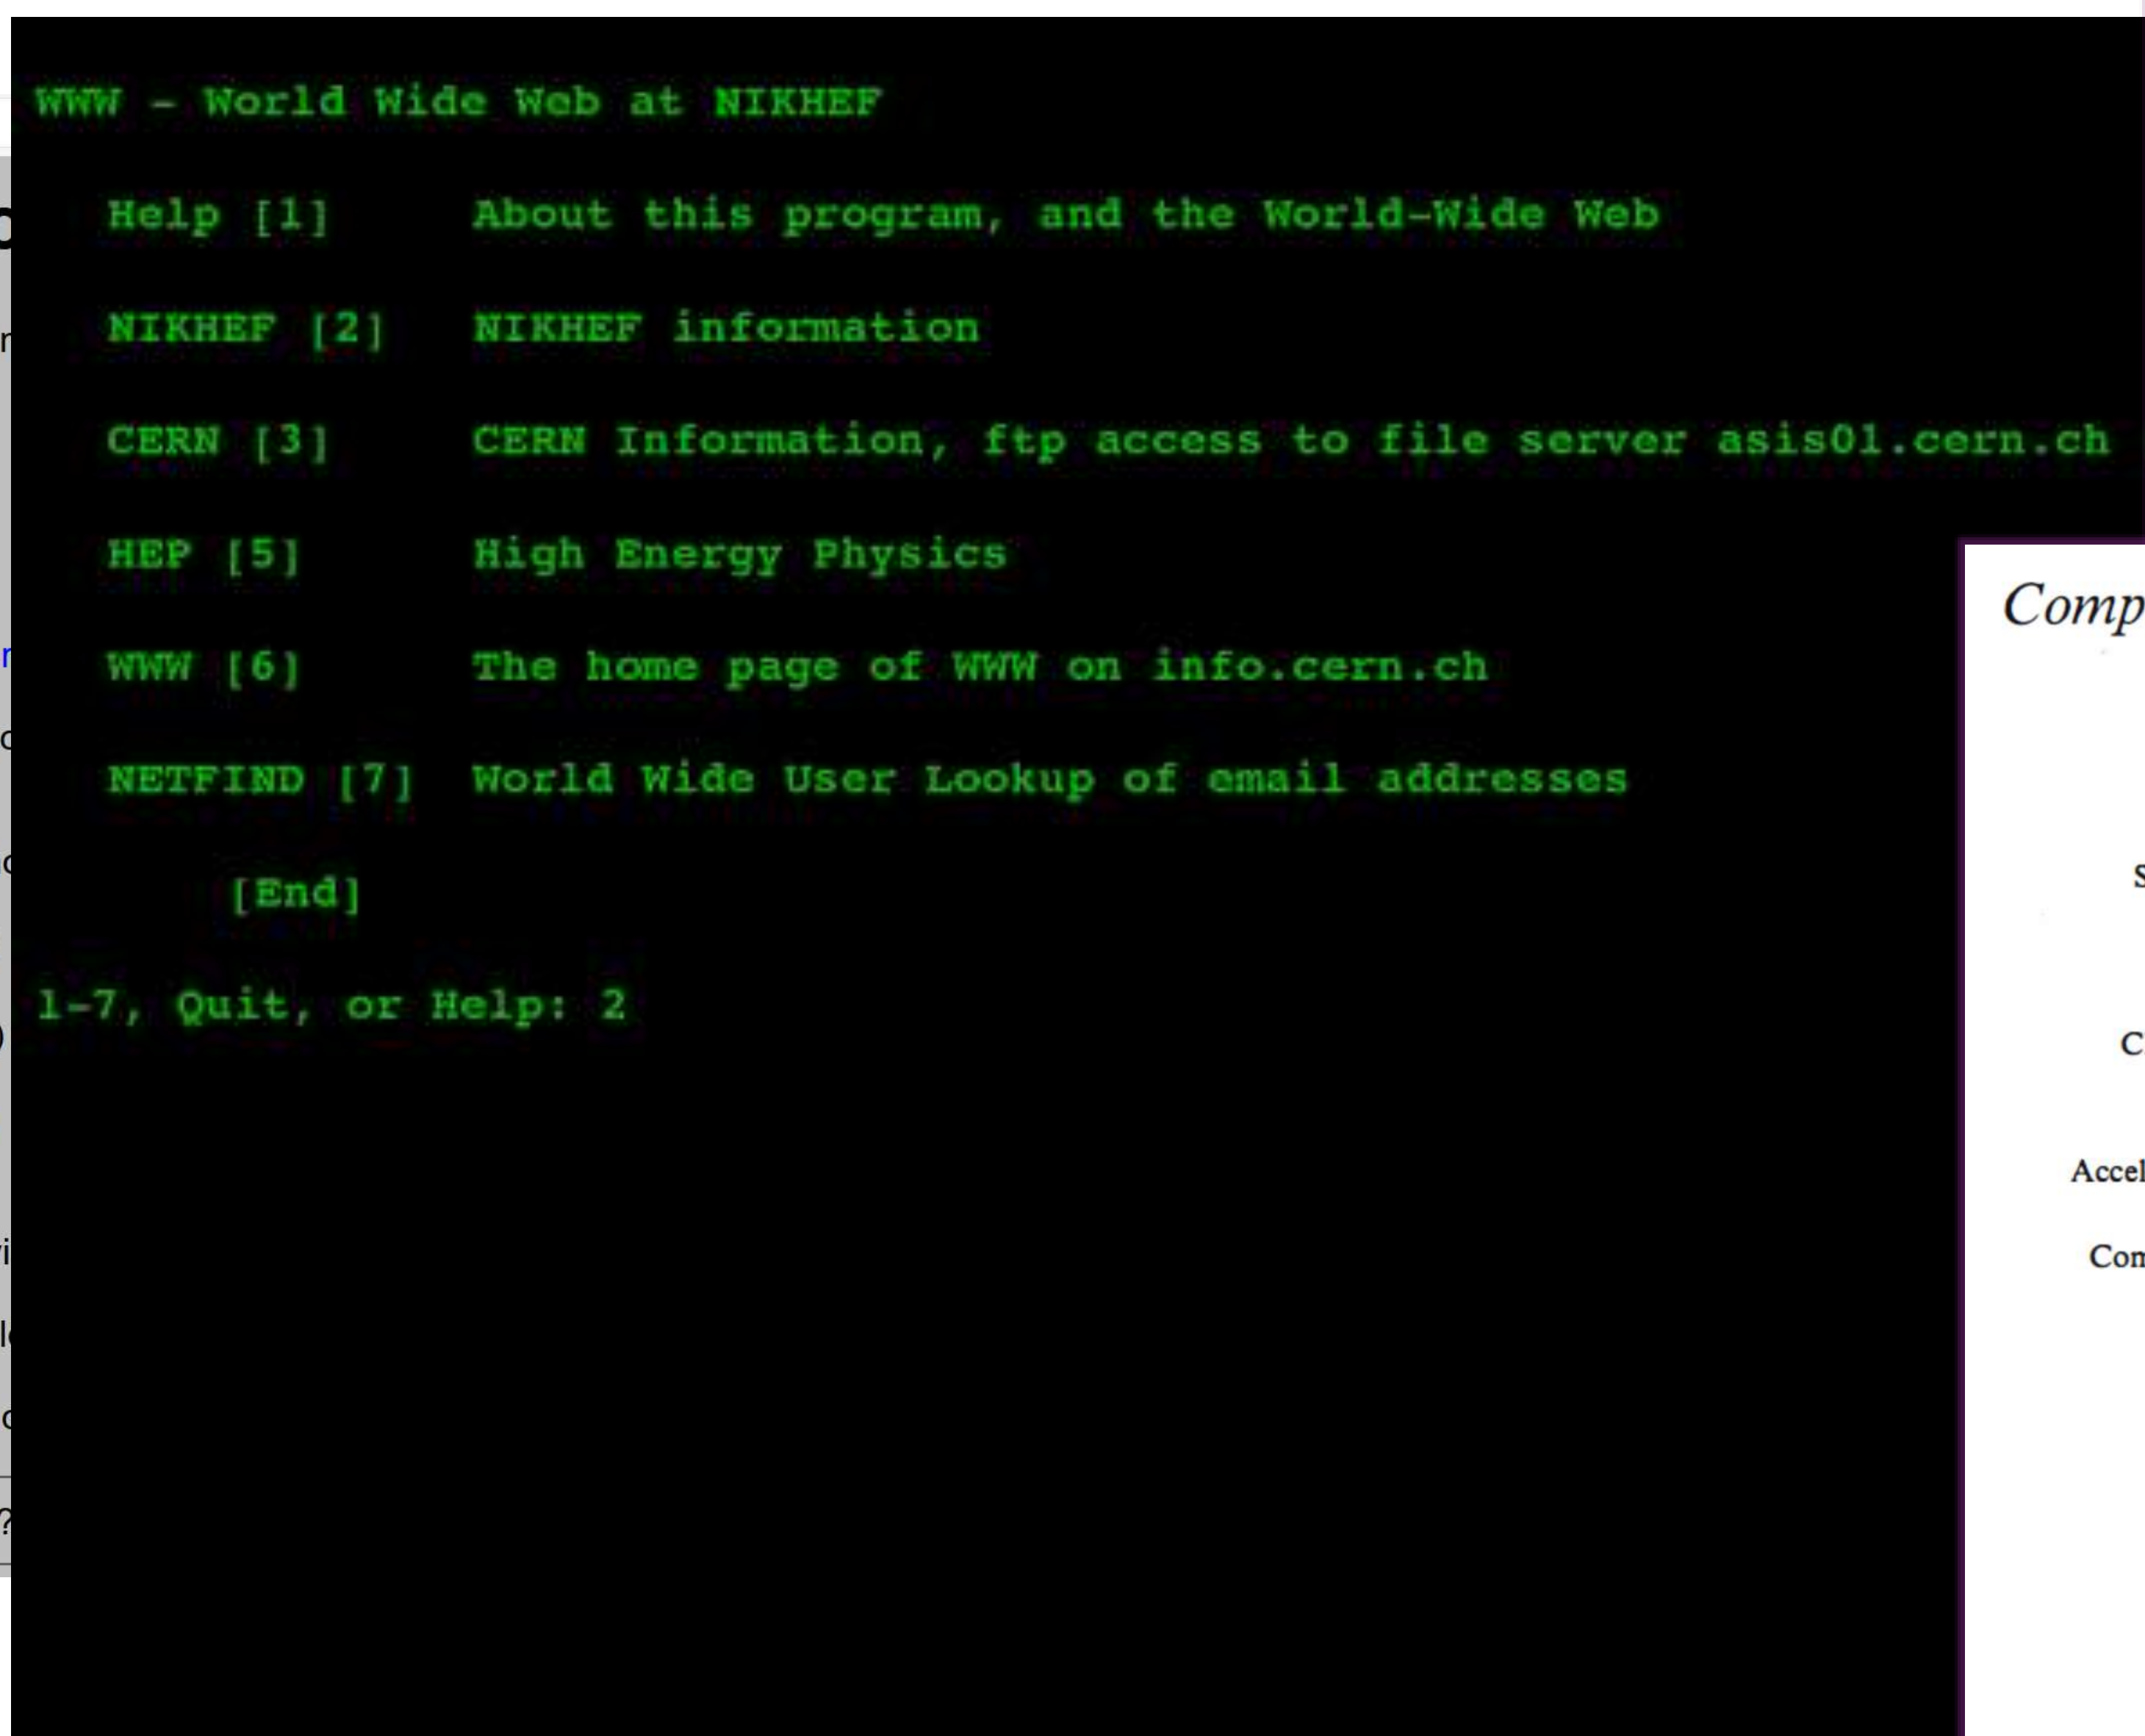

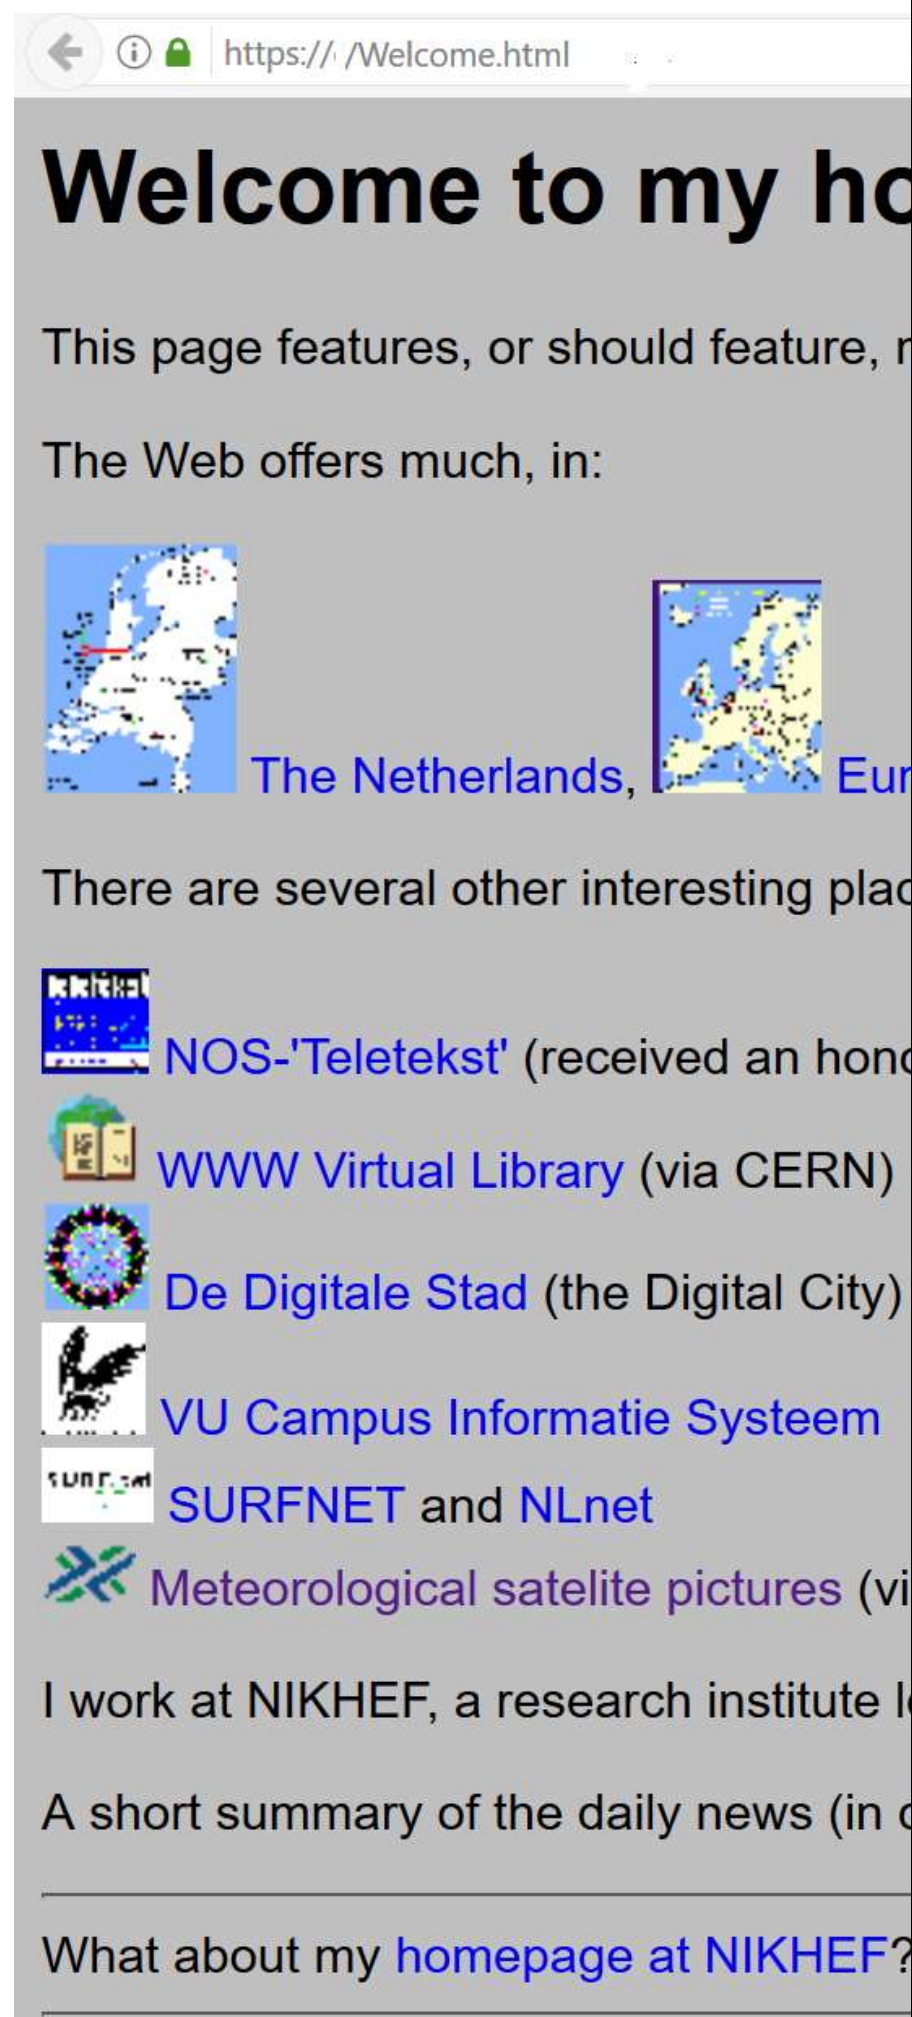

4 NODES

'Ye olde compatibilitye'

ANSNET/NSFNET T3 Topology as of 11/18/91

how would you get to CERN?

⚡ Traceroute measurement to linuxsoft.cern.ch (multihomed)

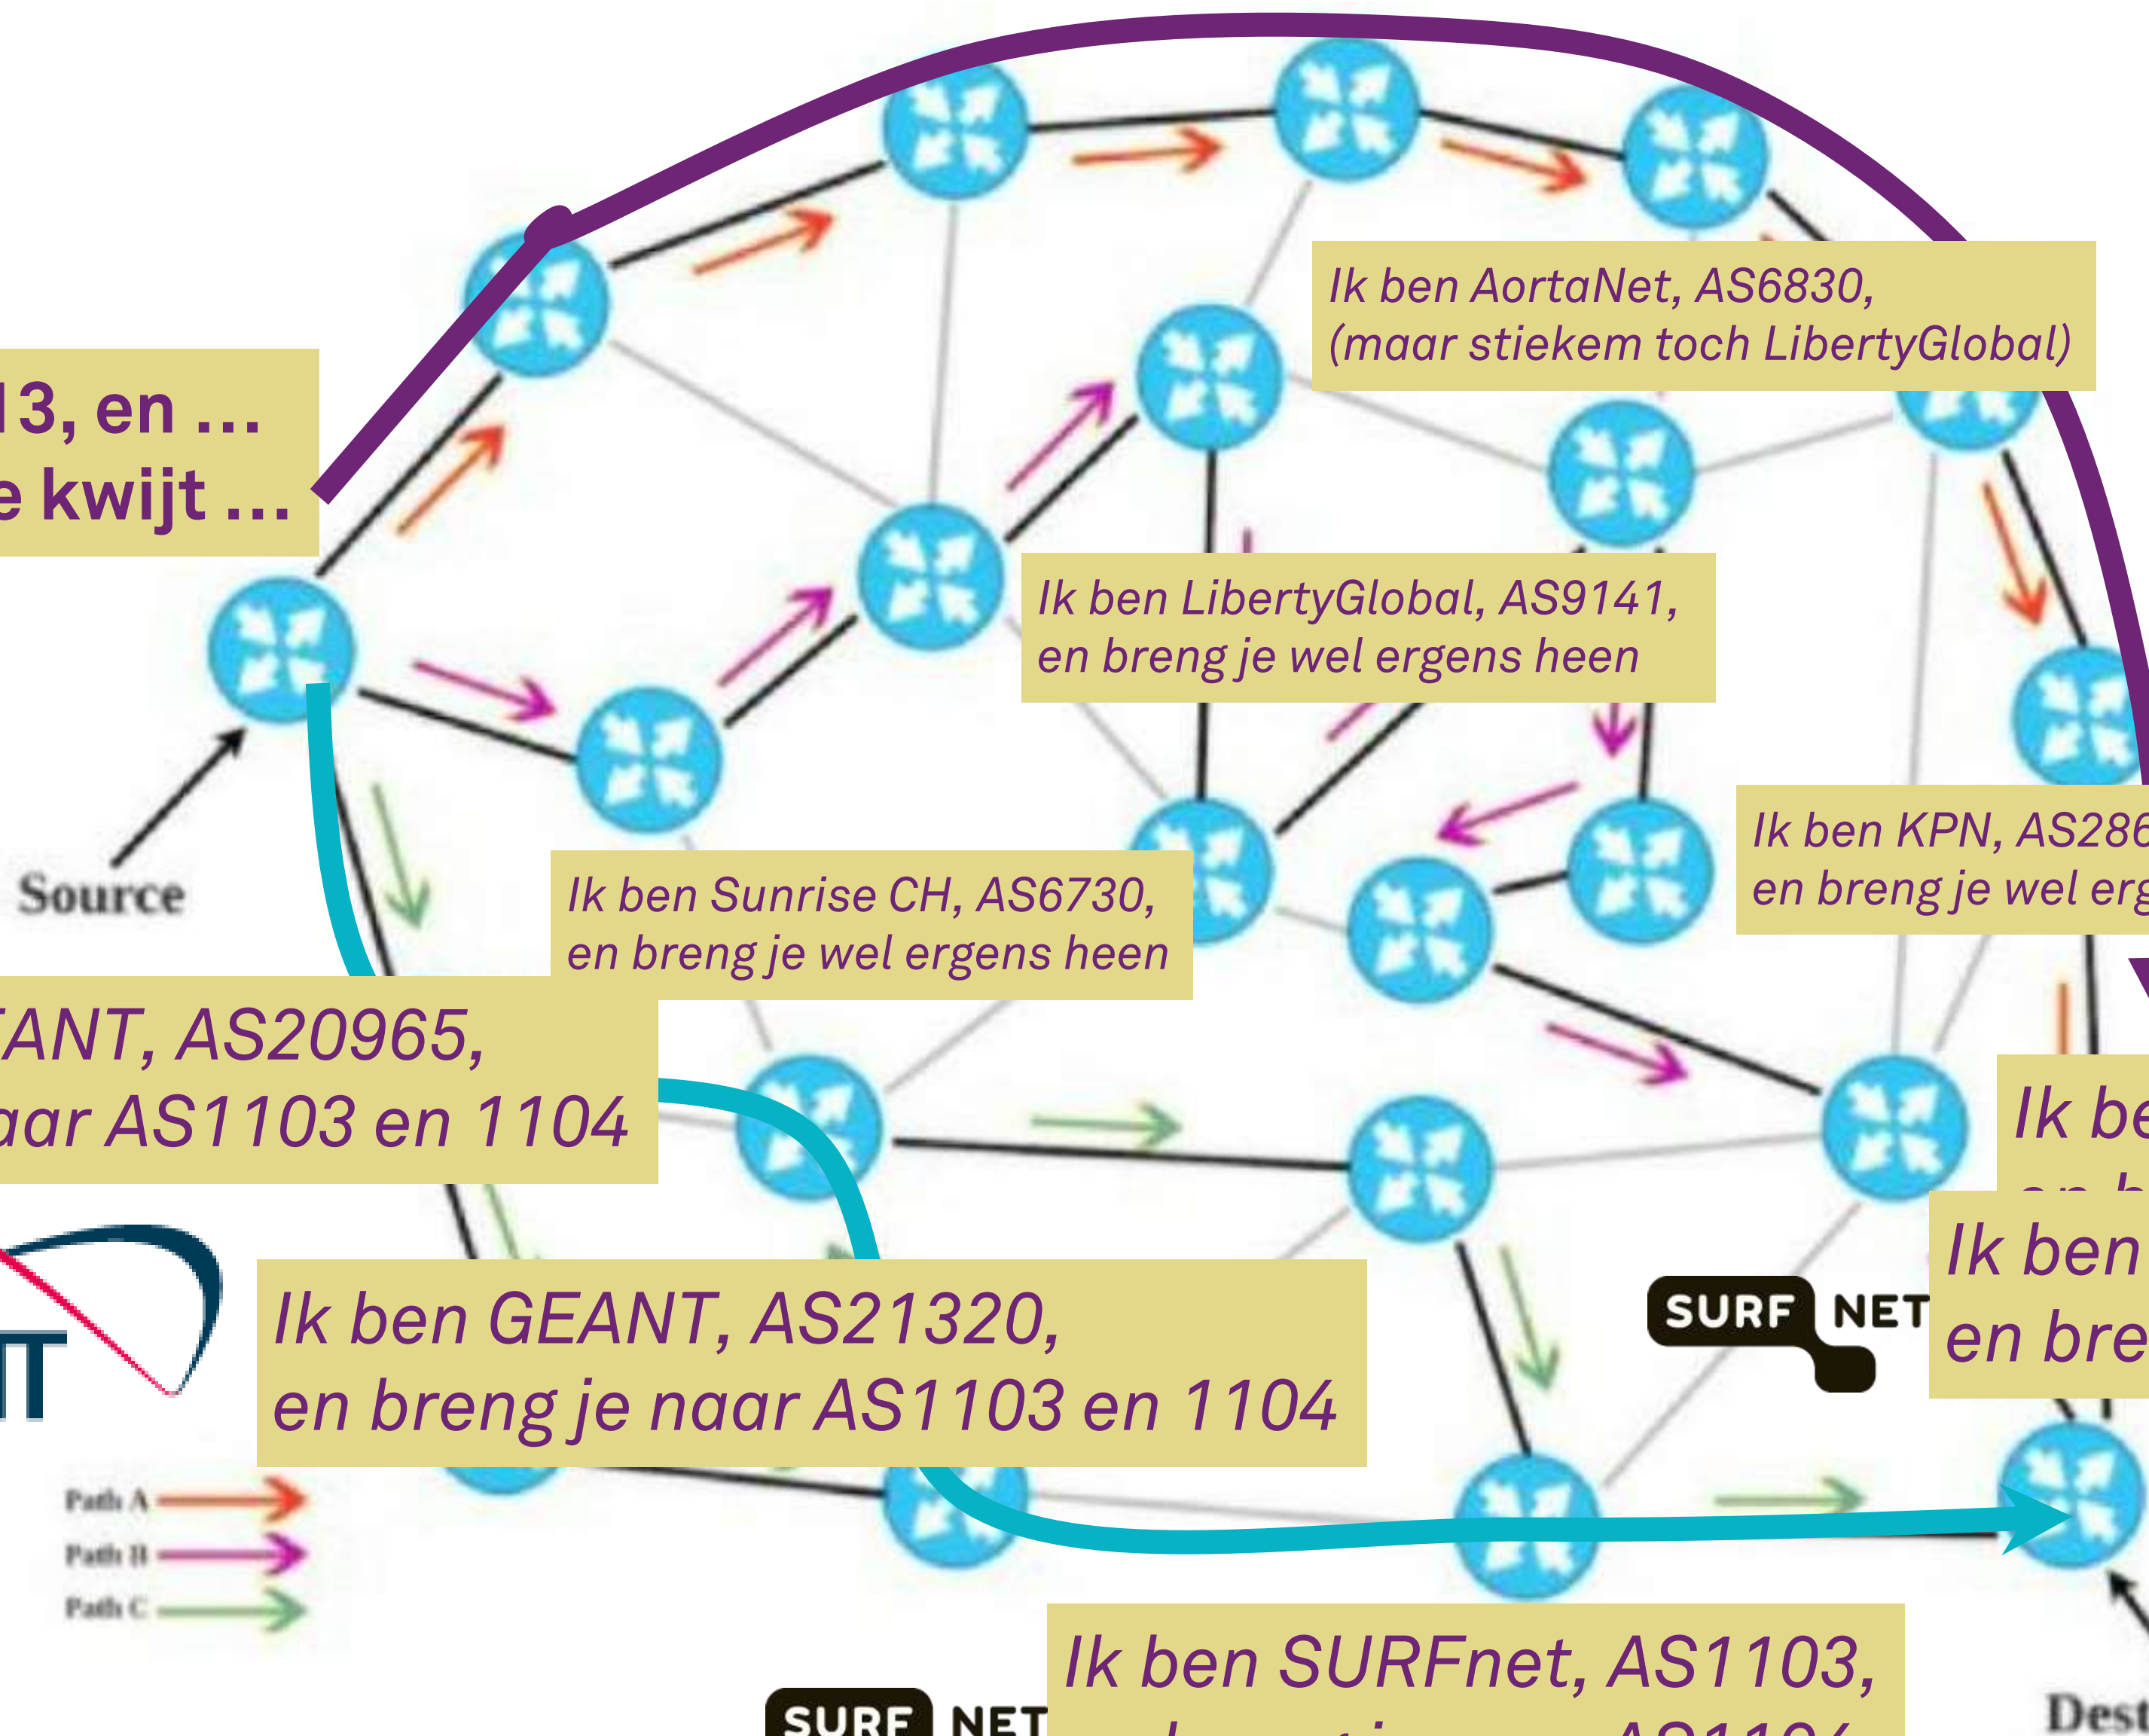

Data: TraceMON IPmap
 from RIPE NCC Atlas
 atlas.ripe.net
 measurement 9249079

Ik ben CERN, AS513, en ...
ik wil m'n pakketje kwijt ...

188.184.38.9

Ik ben AortaNet, AS6830,
(maar stiekem toch LibertyGlobal)

Ik ben LibertyGlobal, AS9141,
en breng je wel ergens heen

Ik ben KPN, AS286,
en breng je wel ergens heen

Ik ben Sunrise CH, AS6730,
en breng je wel ergens heen

Ik ben ook GEANT, AS20965,
en breng je naar AS1103 en 1104

Ik ben GEANT, AS21320,
en breng je naar AS1103 en 1104

Ik ben SURFsara, AS1162,
en breng je direct naar AS1104!
Ik ben SURFnet, AS1103,
en breng je naar AS1104

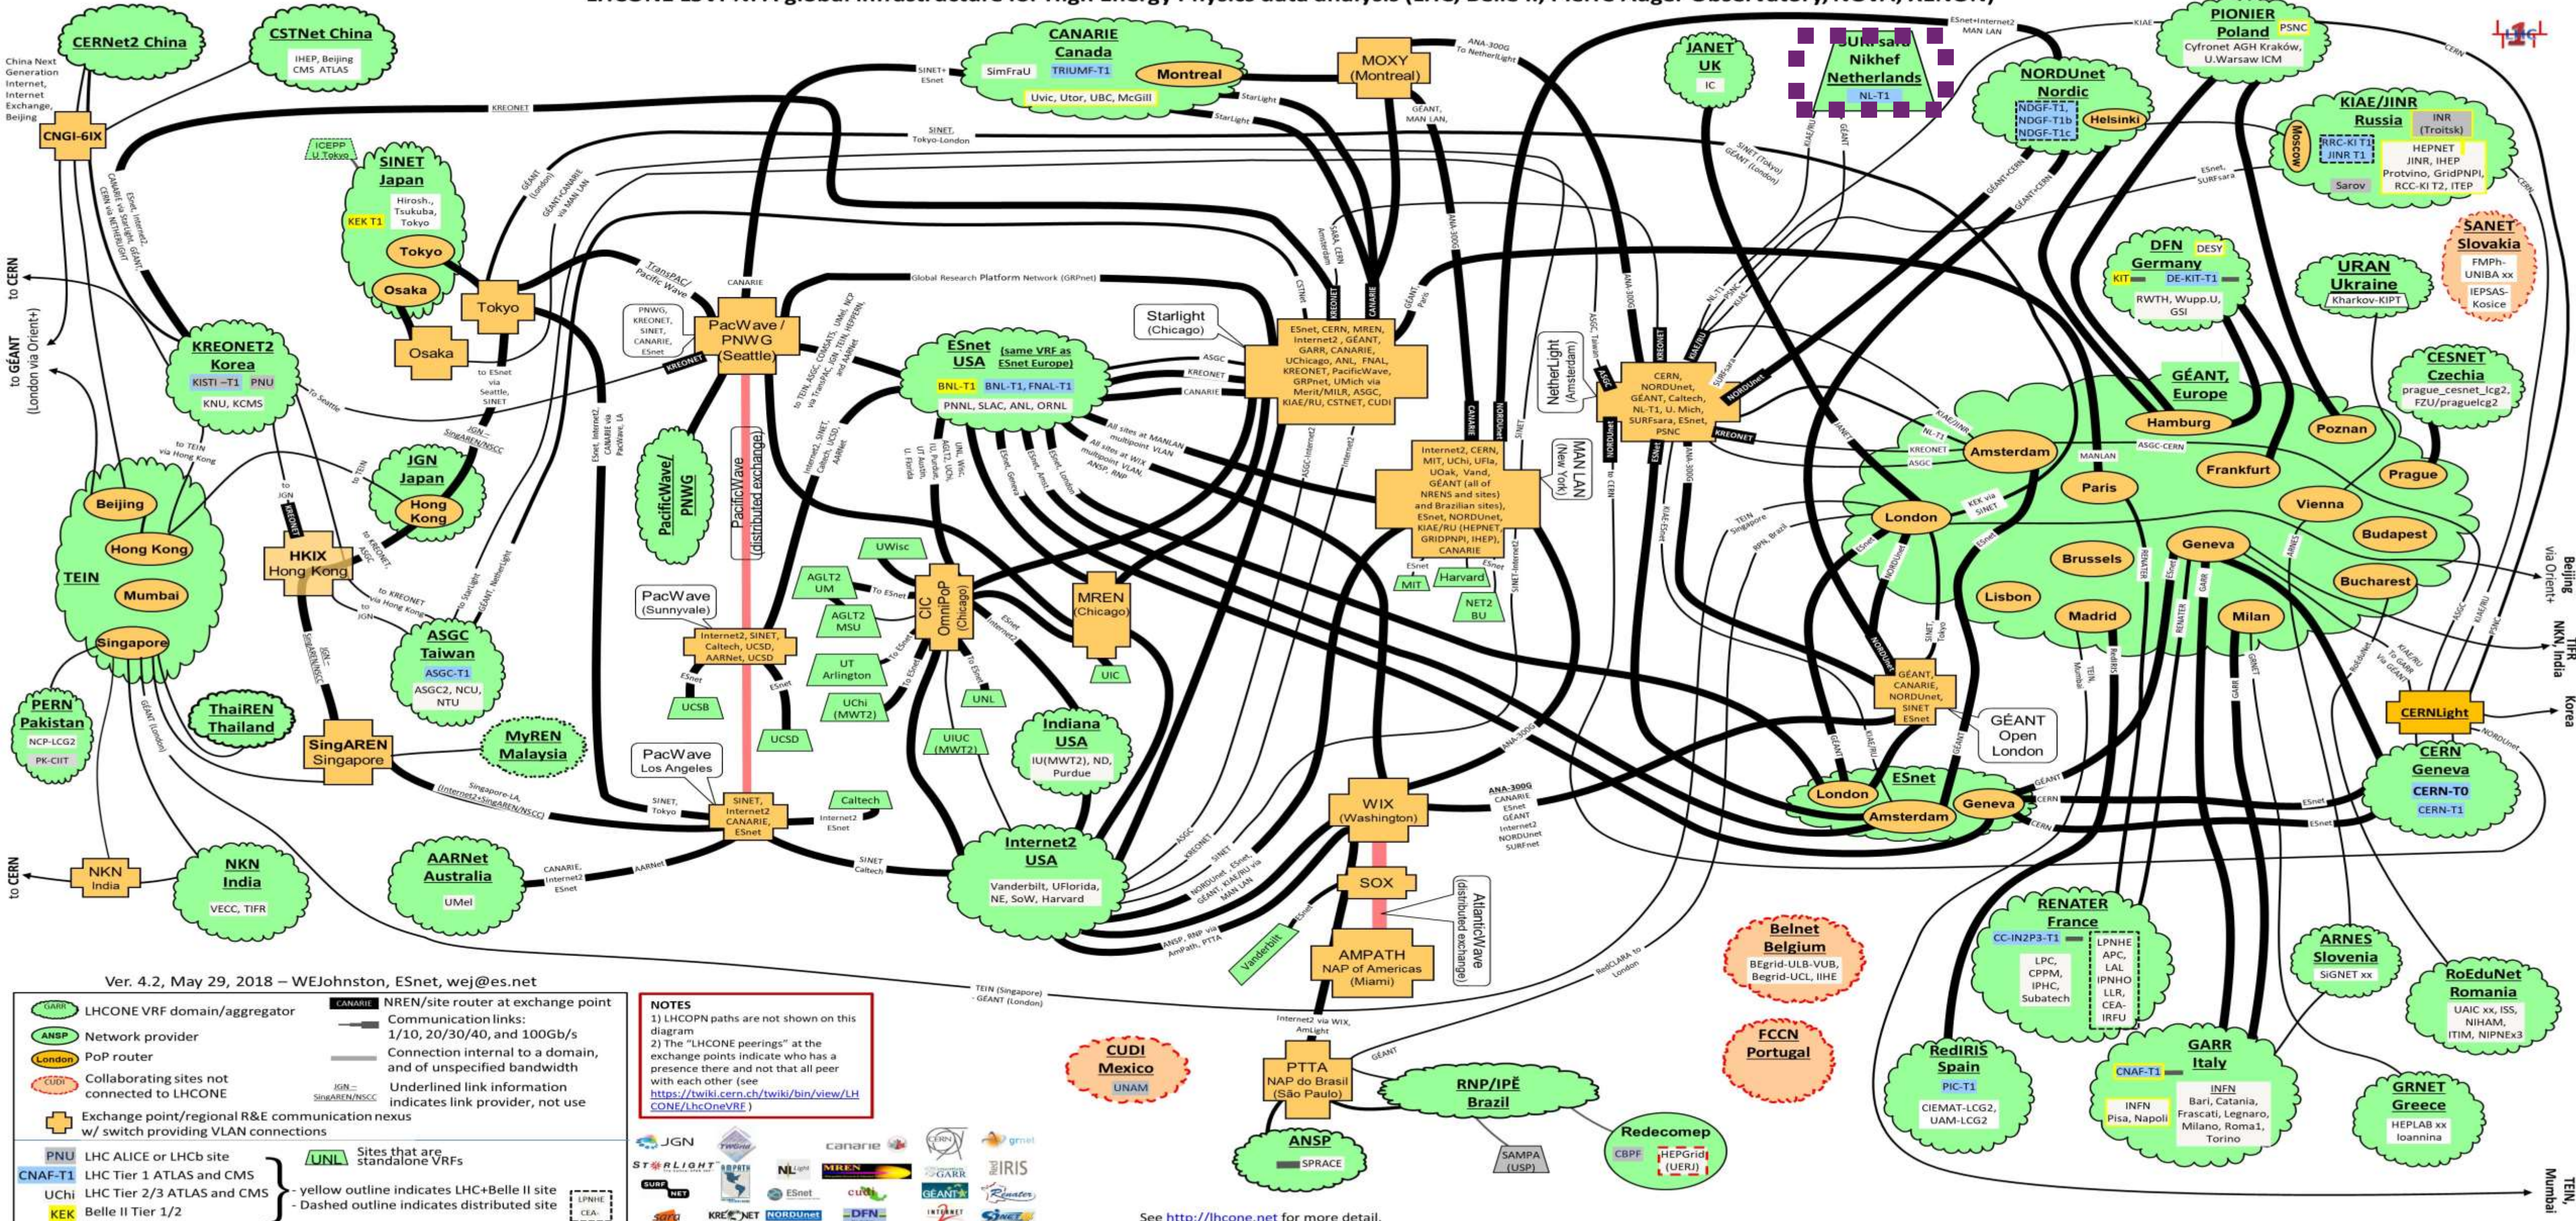

Ik ben Nikhef, AS1104
en ik heb schijfruimte voor je

Ik ben SURFnet, AS1103,
en breng je naar AS1104

LHCONE L3VPN: A global infrastructure for High Energy Physics data analysis (LHC, Belle II, Pierre Auger Observatory, NOvA, XENON)

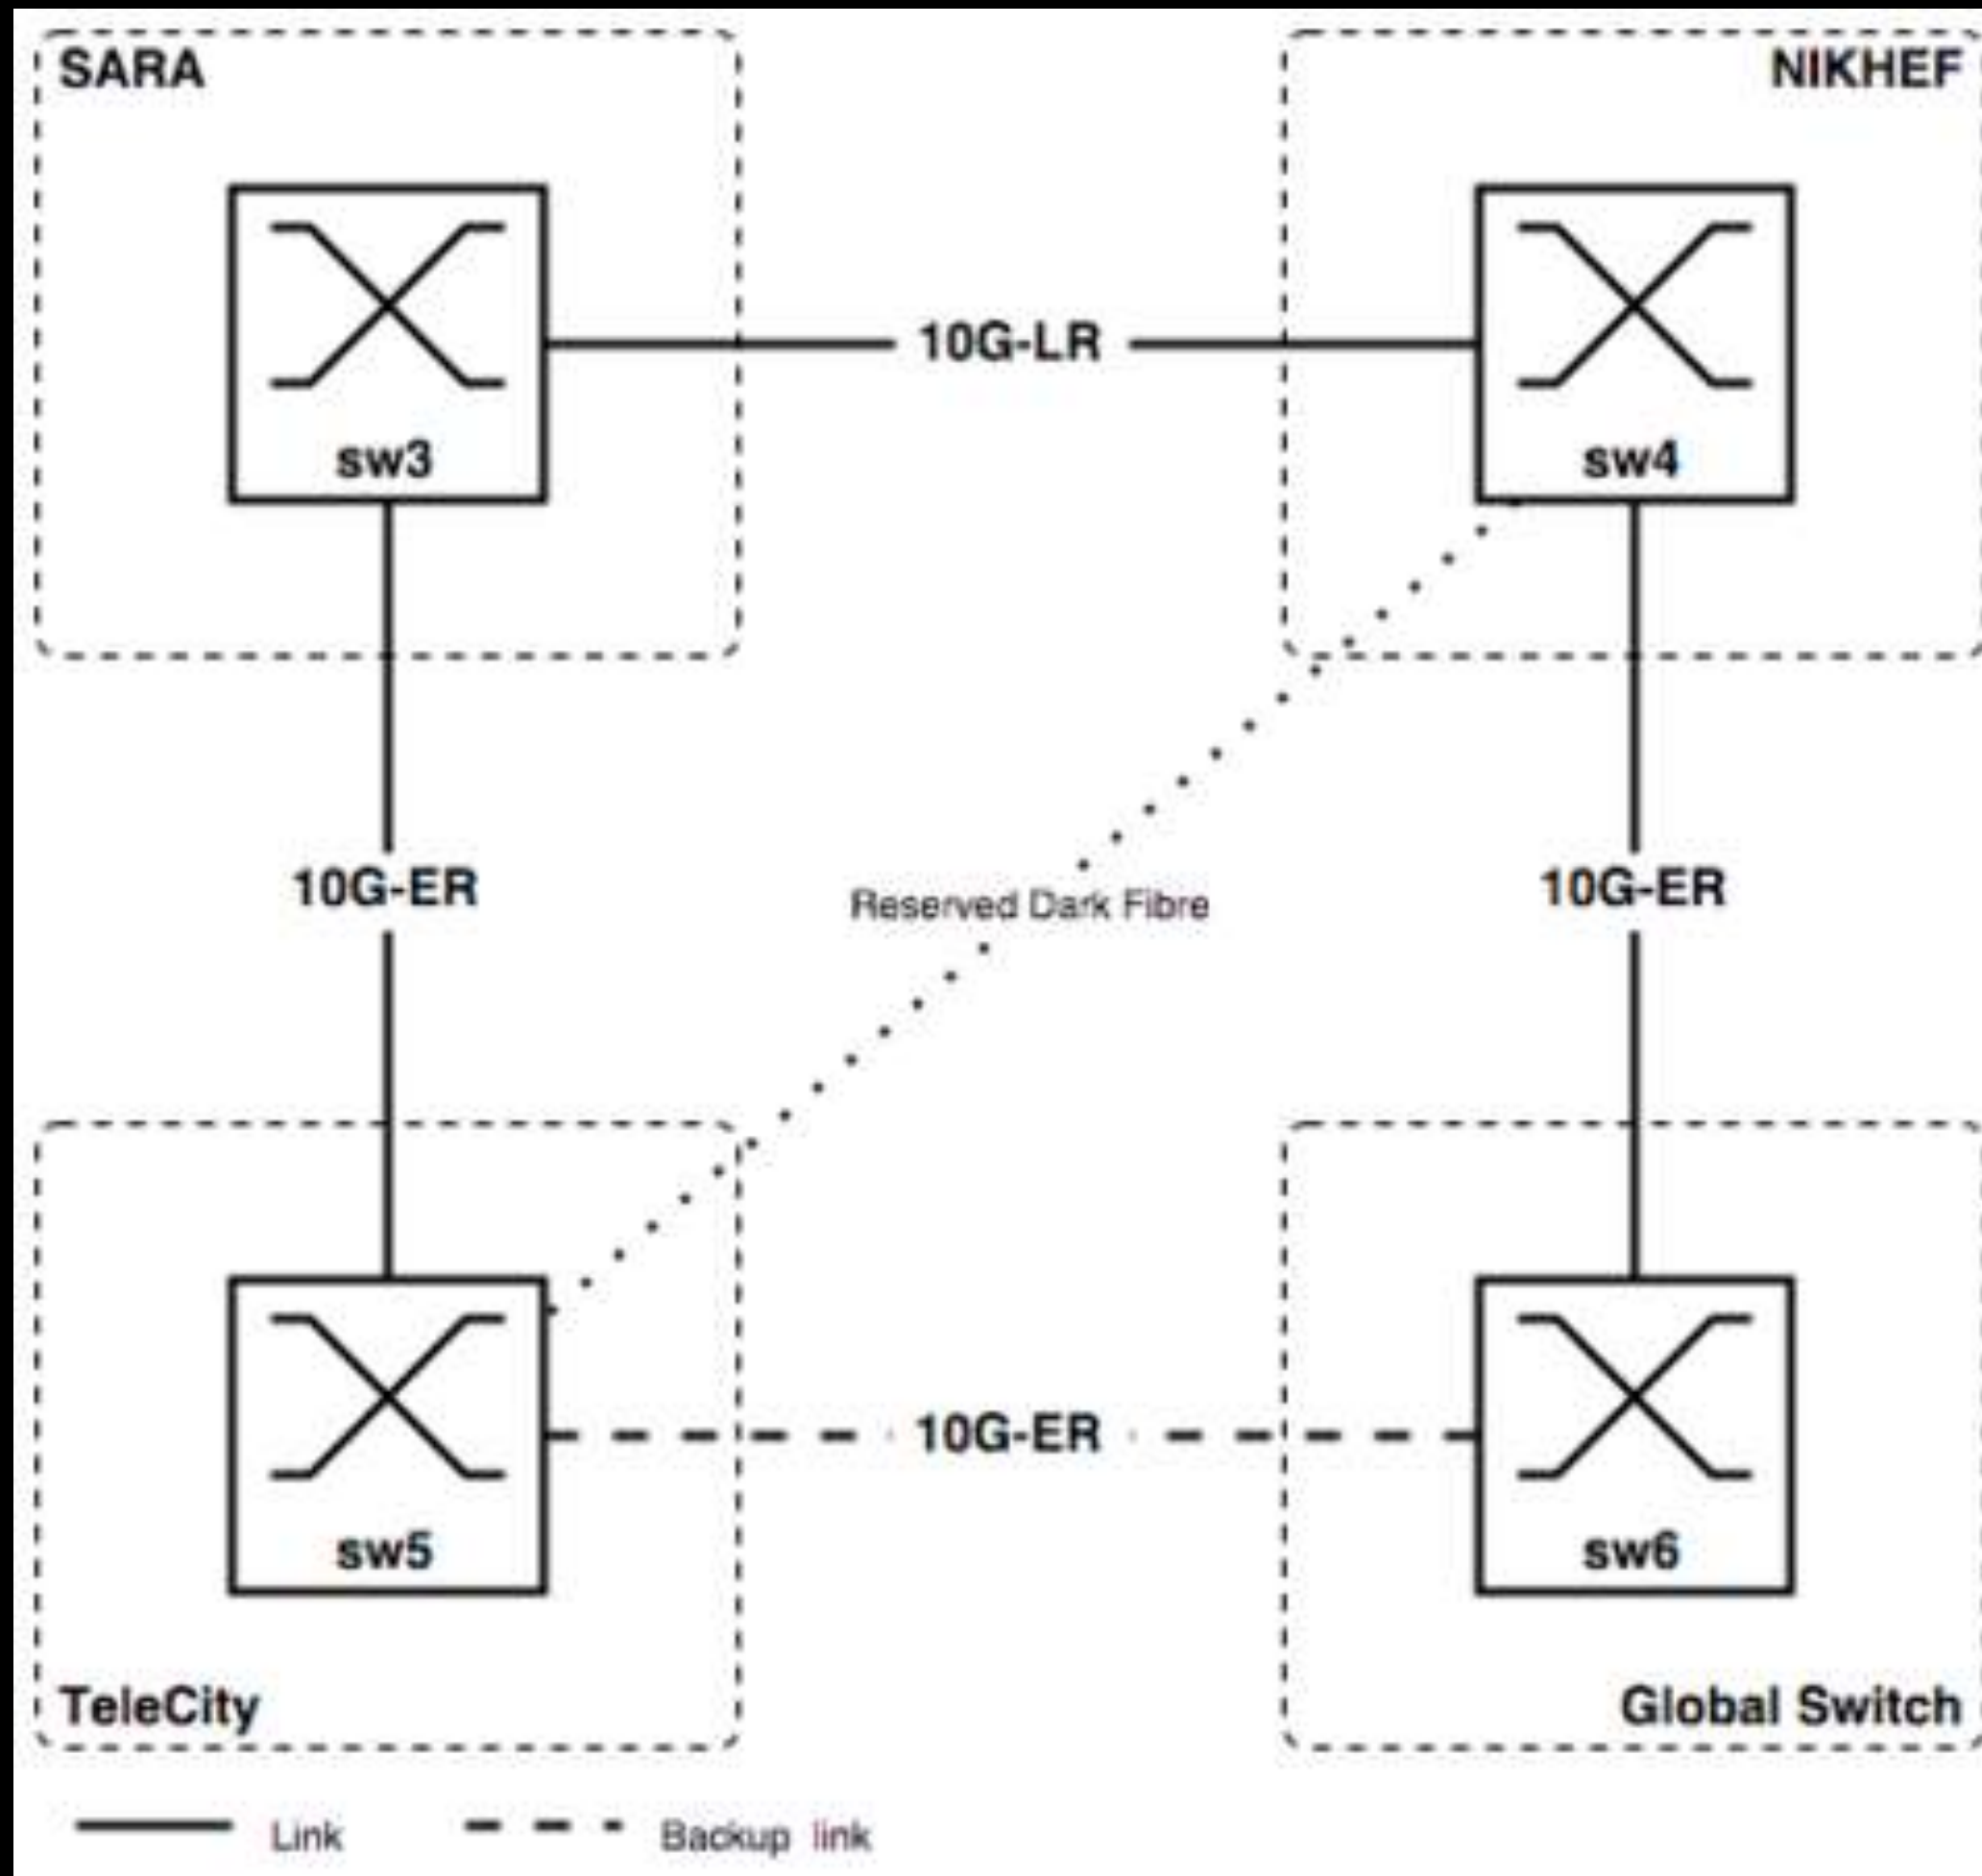

this is how H1.40 could have looked ...
it is actually the Nikhef-K computer room
on the Oosterringdijk

1996, Nikhef H1.40

the yellow Ethernet cable is the WCW local area loop for the International Backbone Router (IBR-LAN)

traffic graph: aggregate AMS-IX NL traffic on Sept 9, 2019
 about 20% of the AMS-IX traffic is at Nikhef, out of 16 locations total
 source: <https://stats.ams-ix.net/>

Network Data Centres and Housing

- the more ISPs are located together, the easier private peerings become
- parties 'pay their own way' to the housing location, and have their own equipment – so it's not 'free'
- peerings can be settlement-free or paid
- *model takes traffic away from IX-es*

100 Gbps and up ... beyond the LHC!

Thuis 'FttH'
~0.1 – 1 Gbps BX
single strand SC

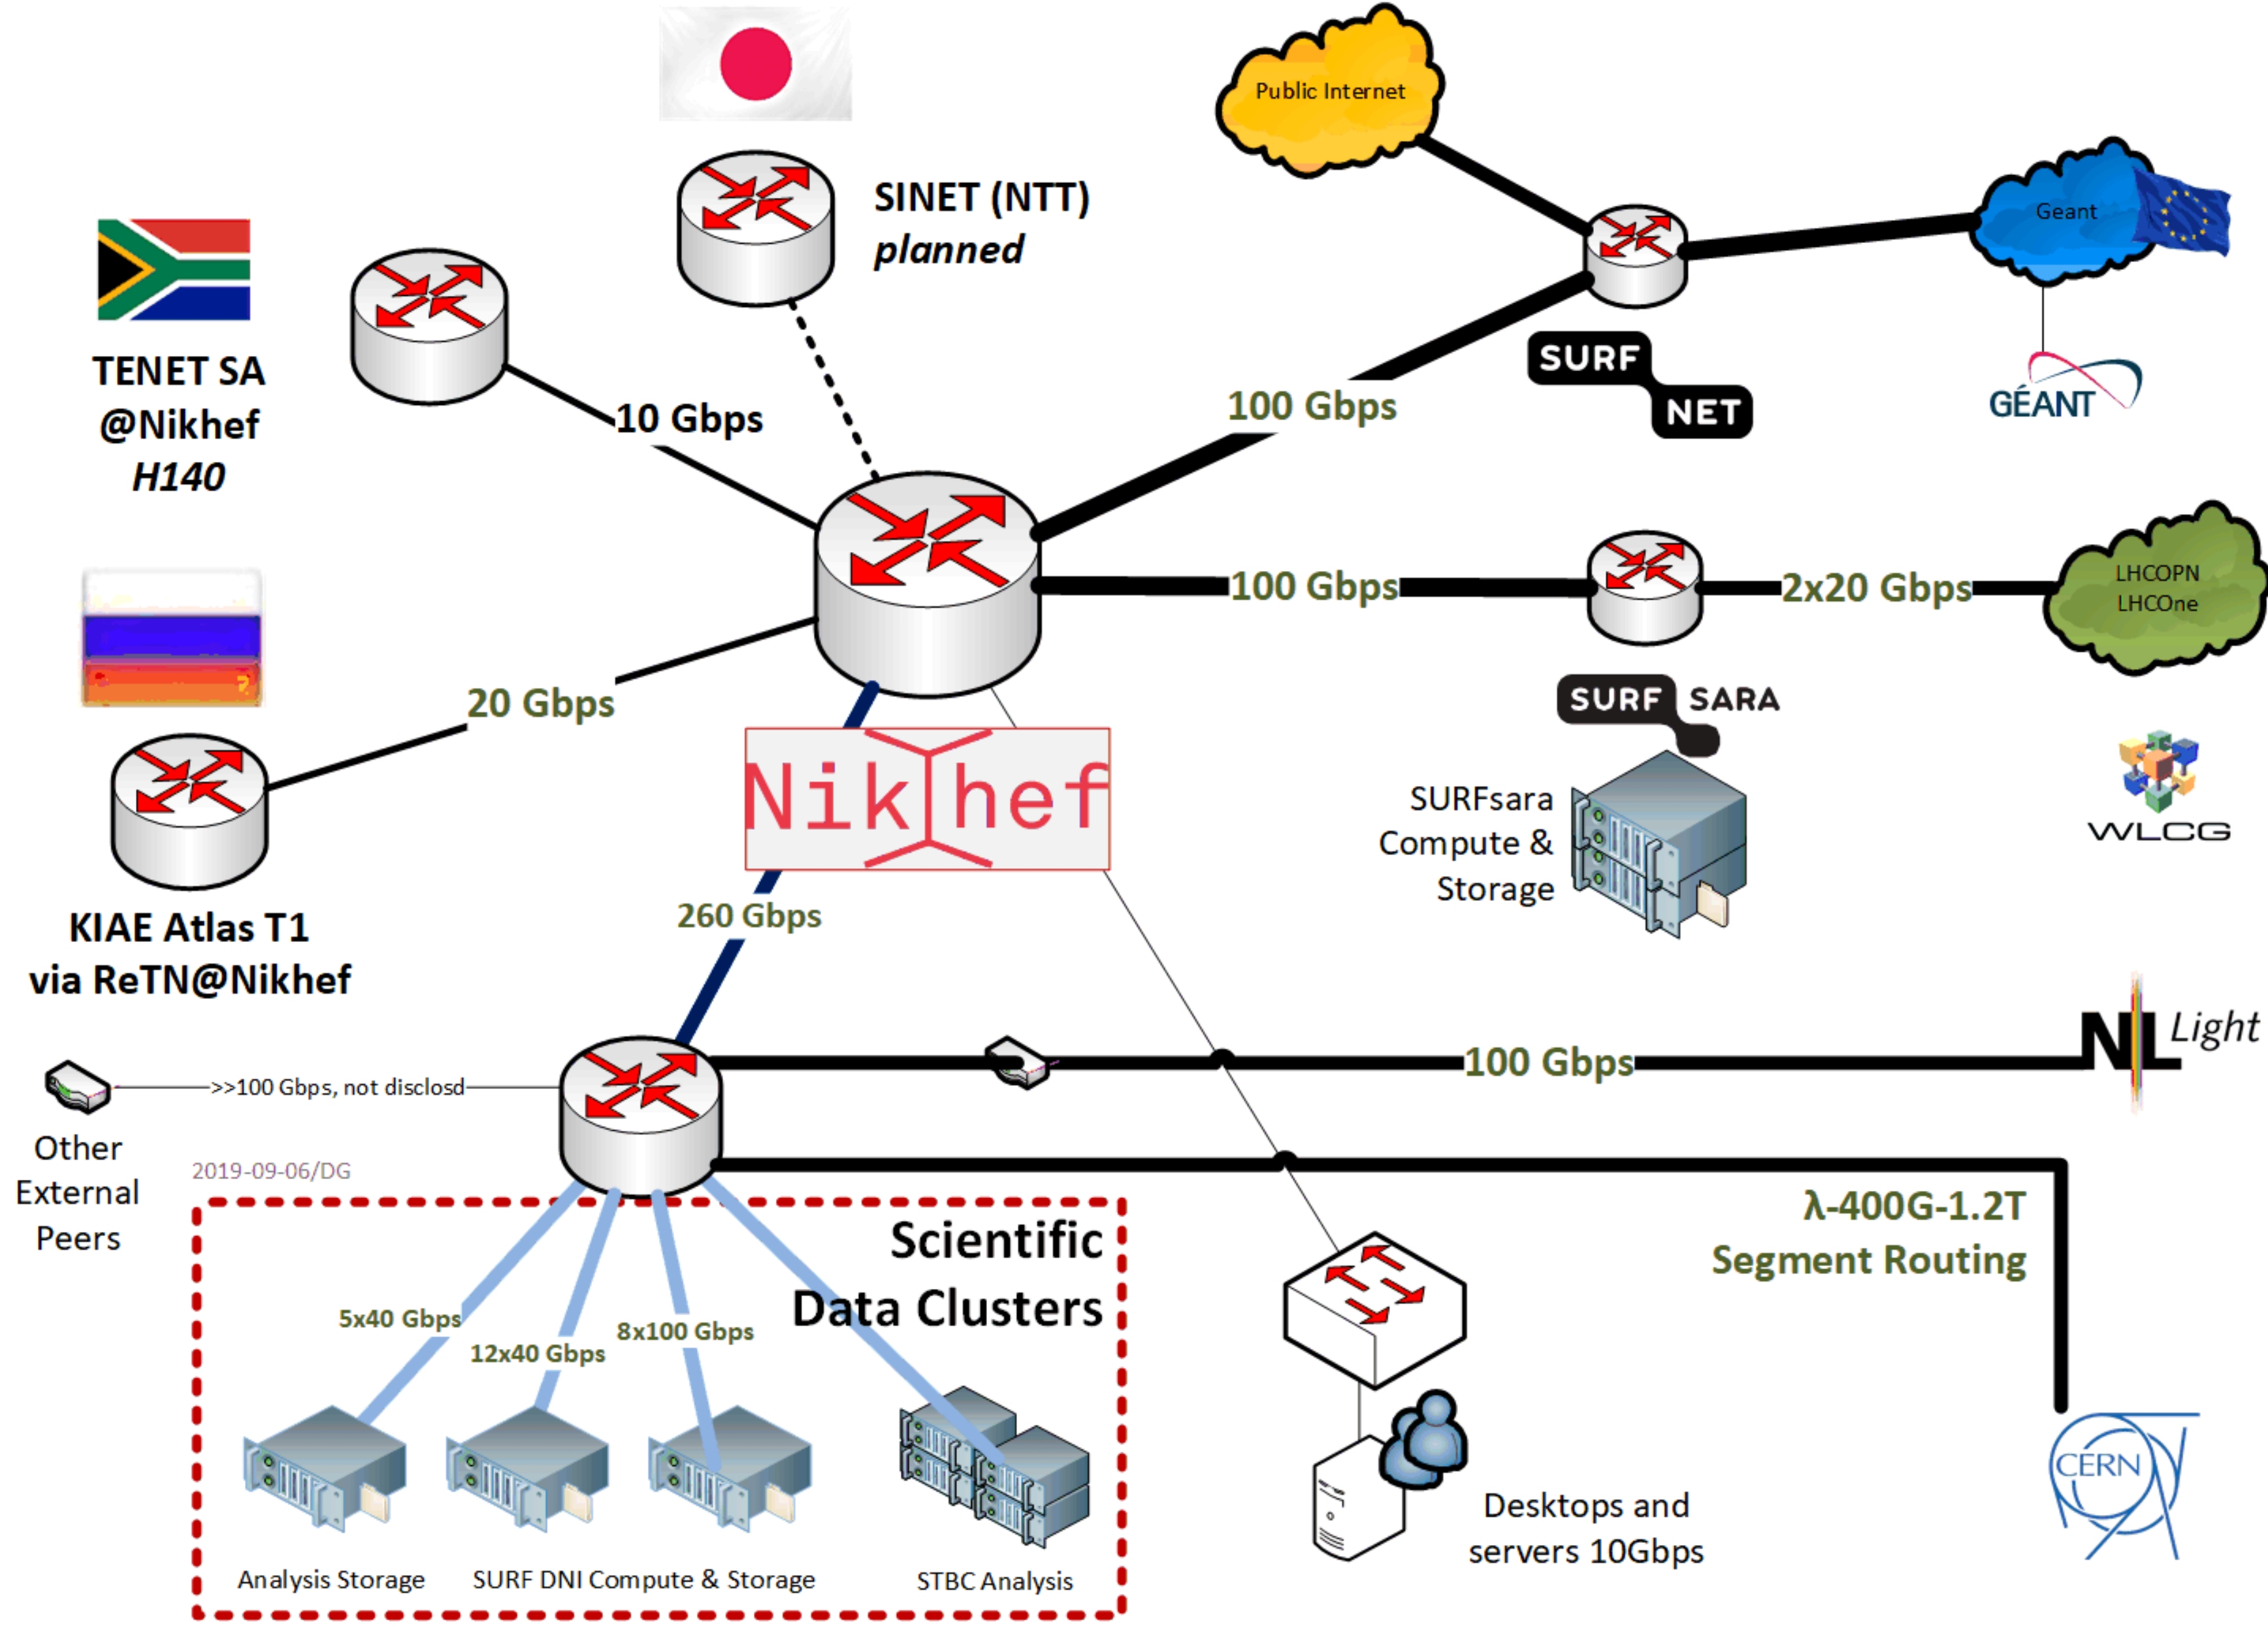

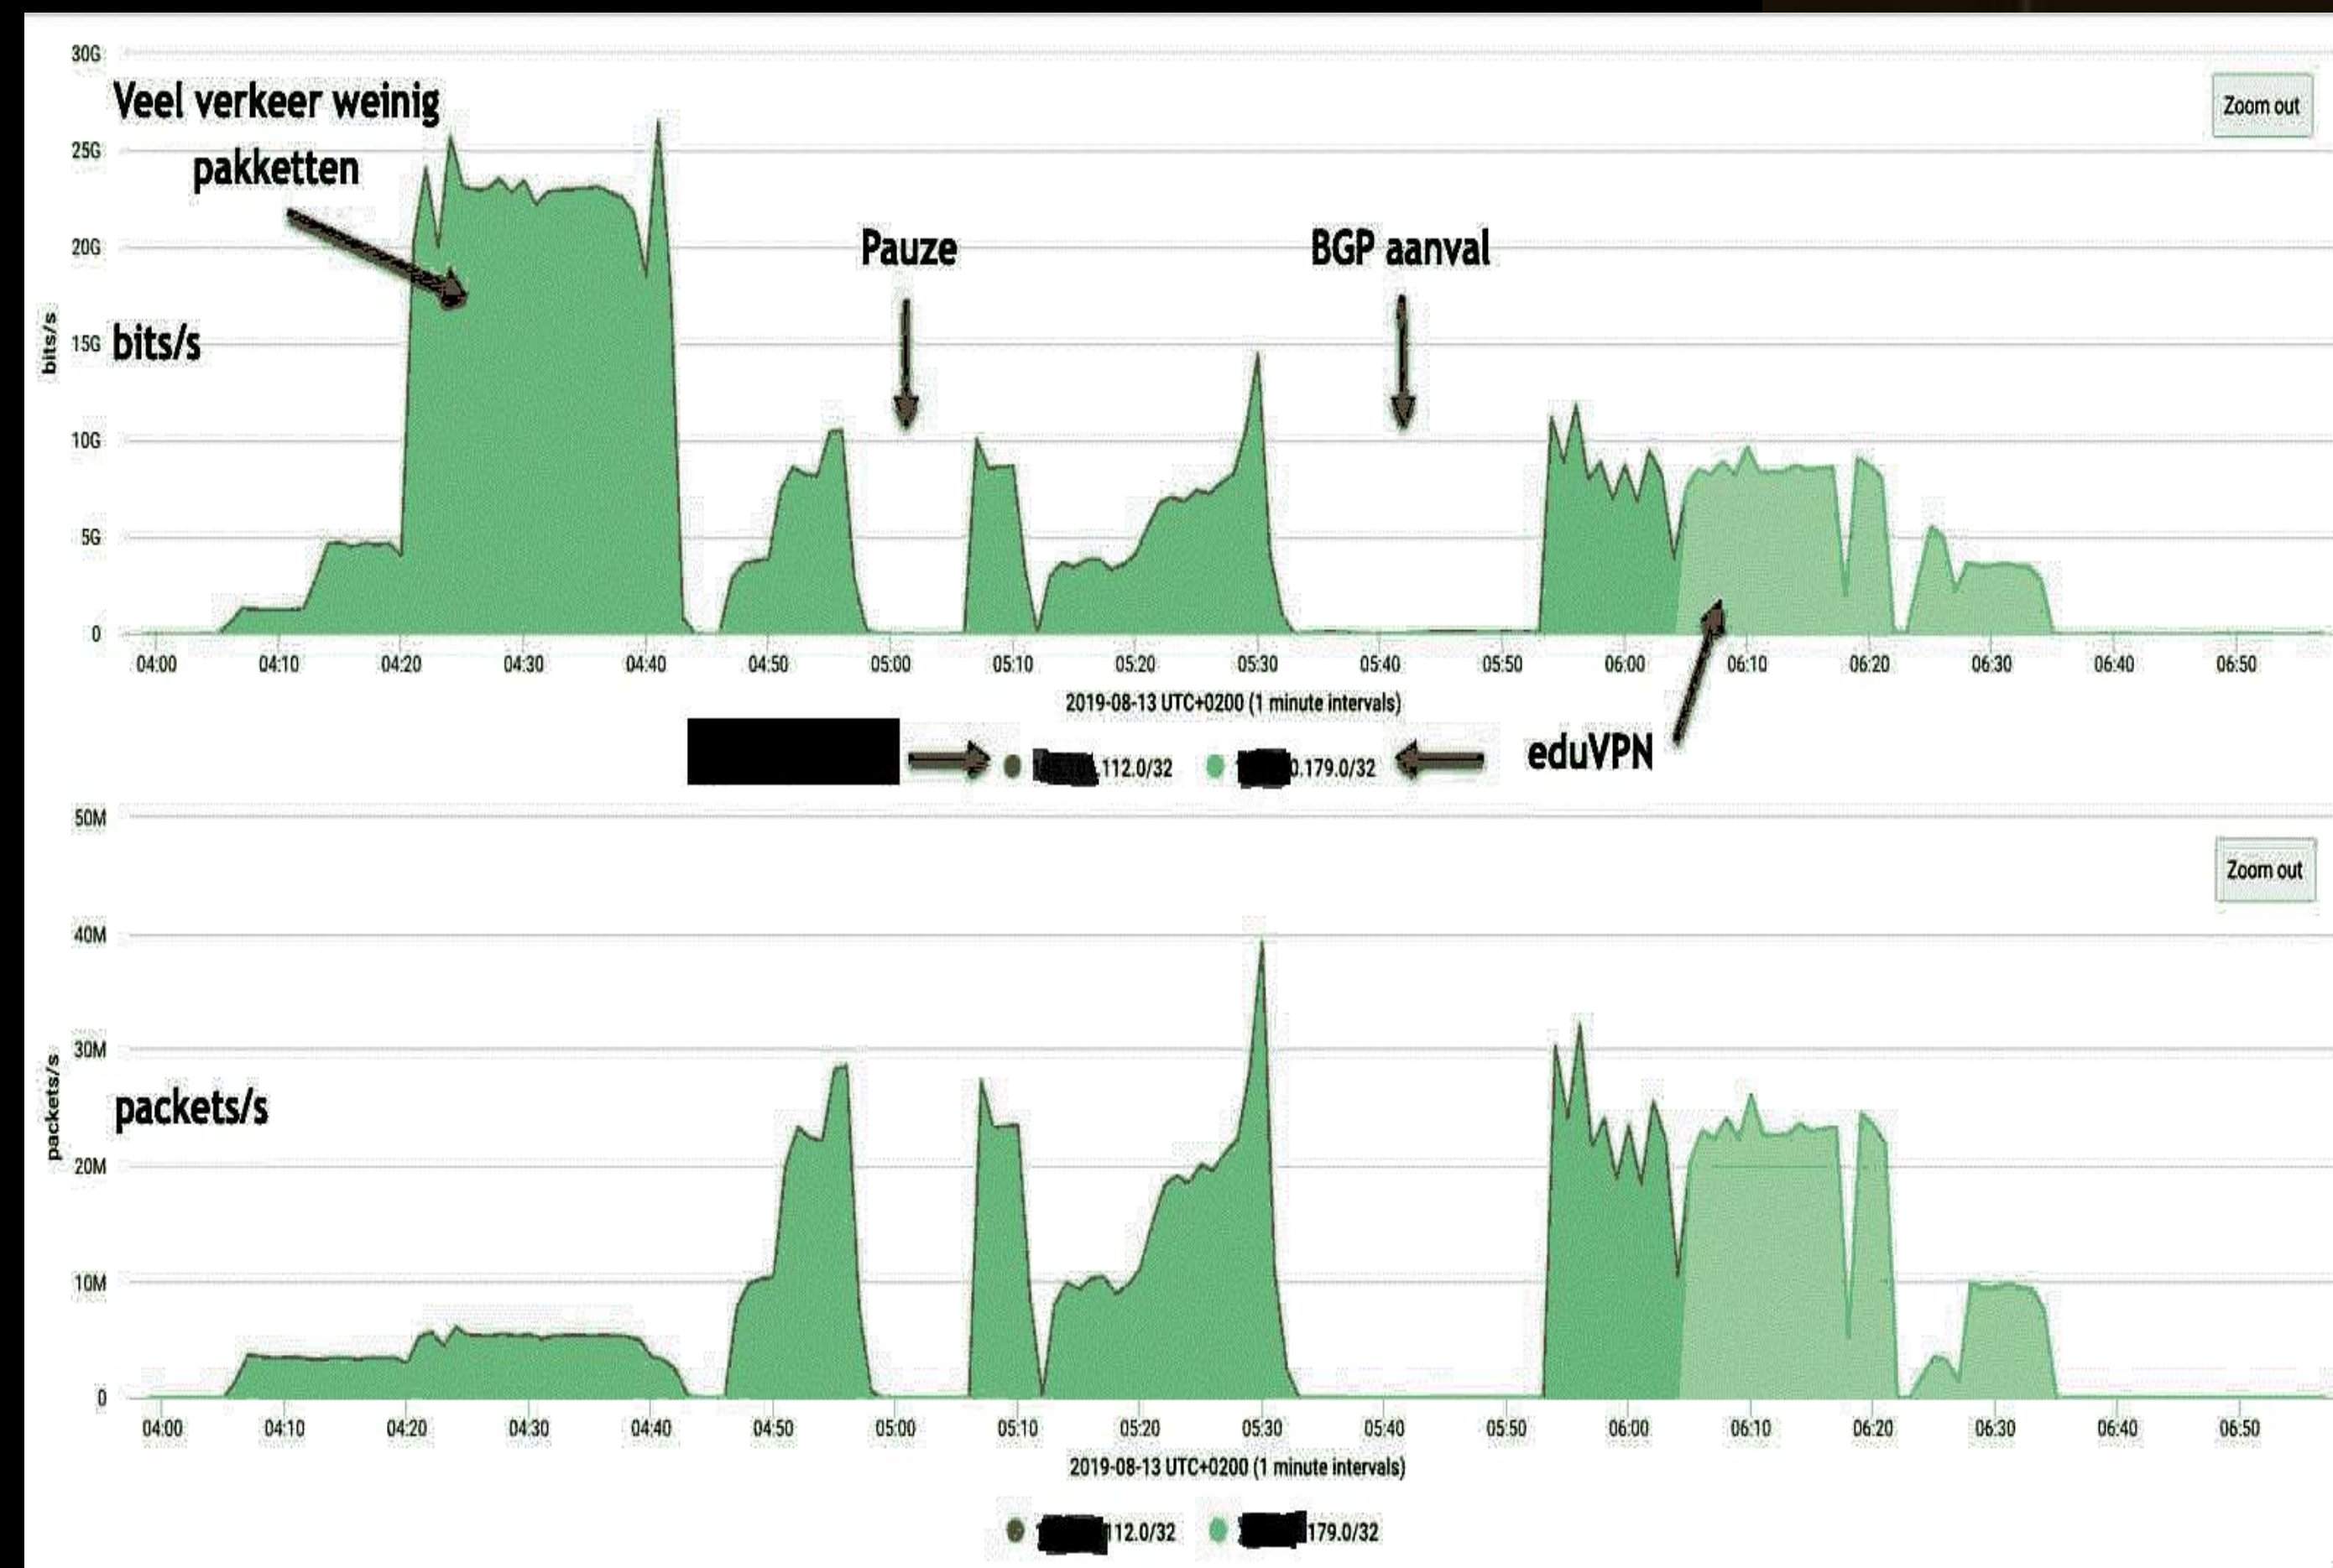

vergelijk:
VDSL BR straatkast
voor als je nog
op xDSL koper zit
0.02-0.2 Gbps

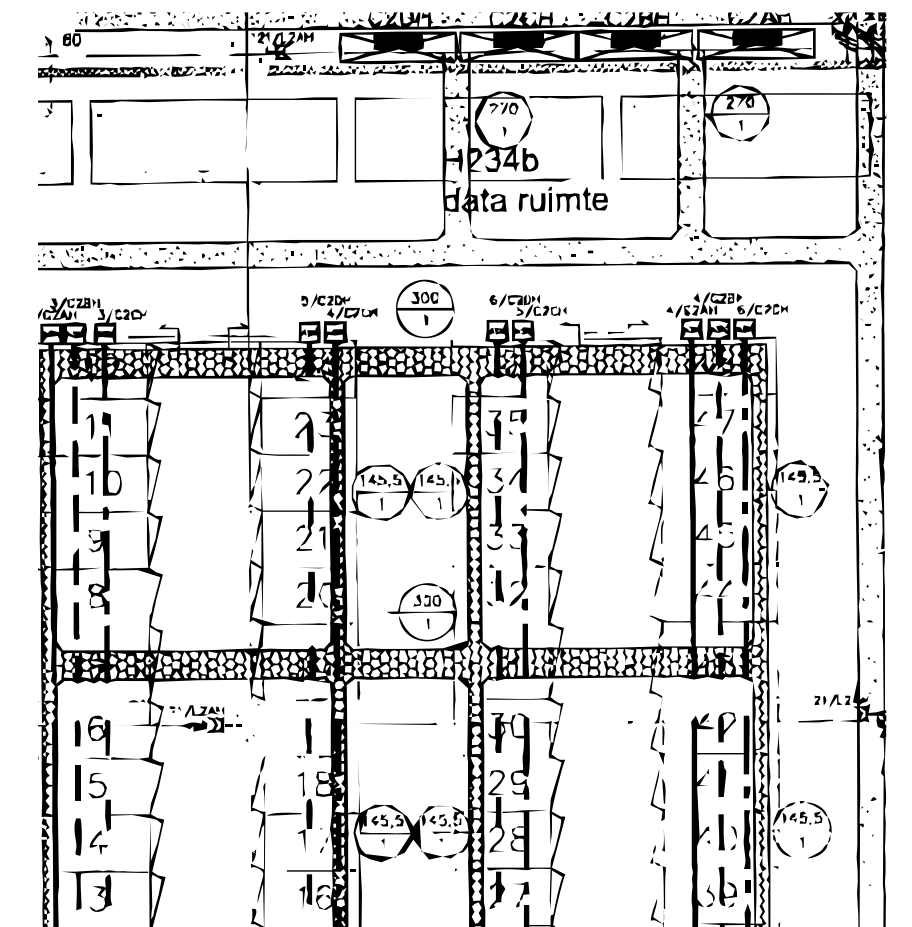

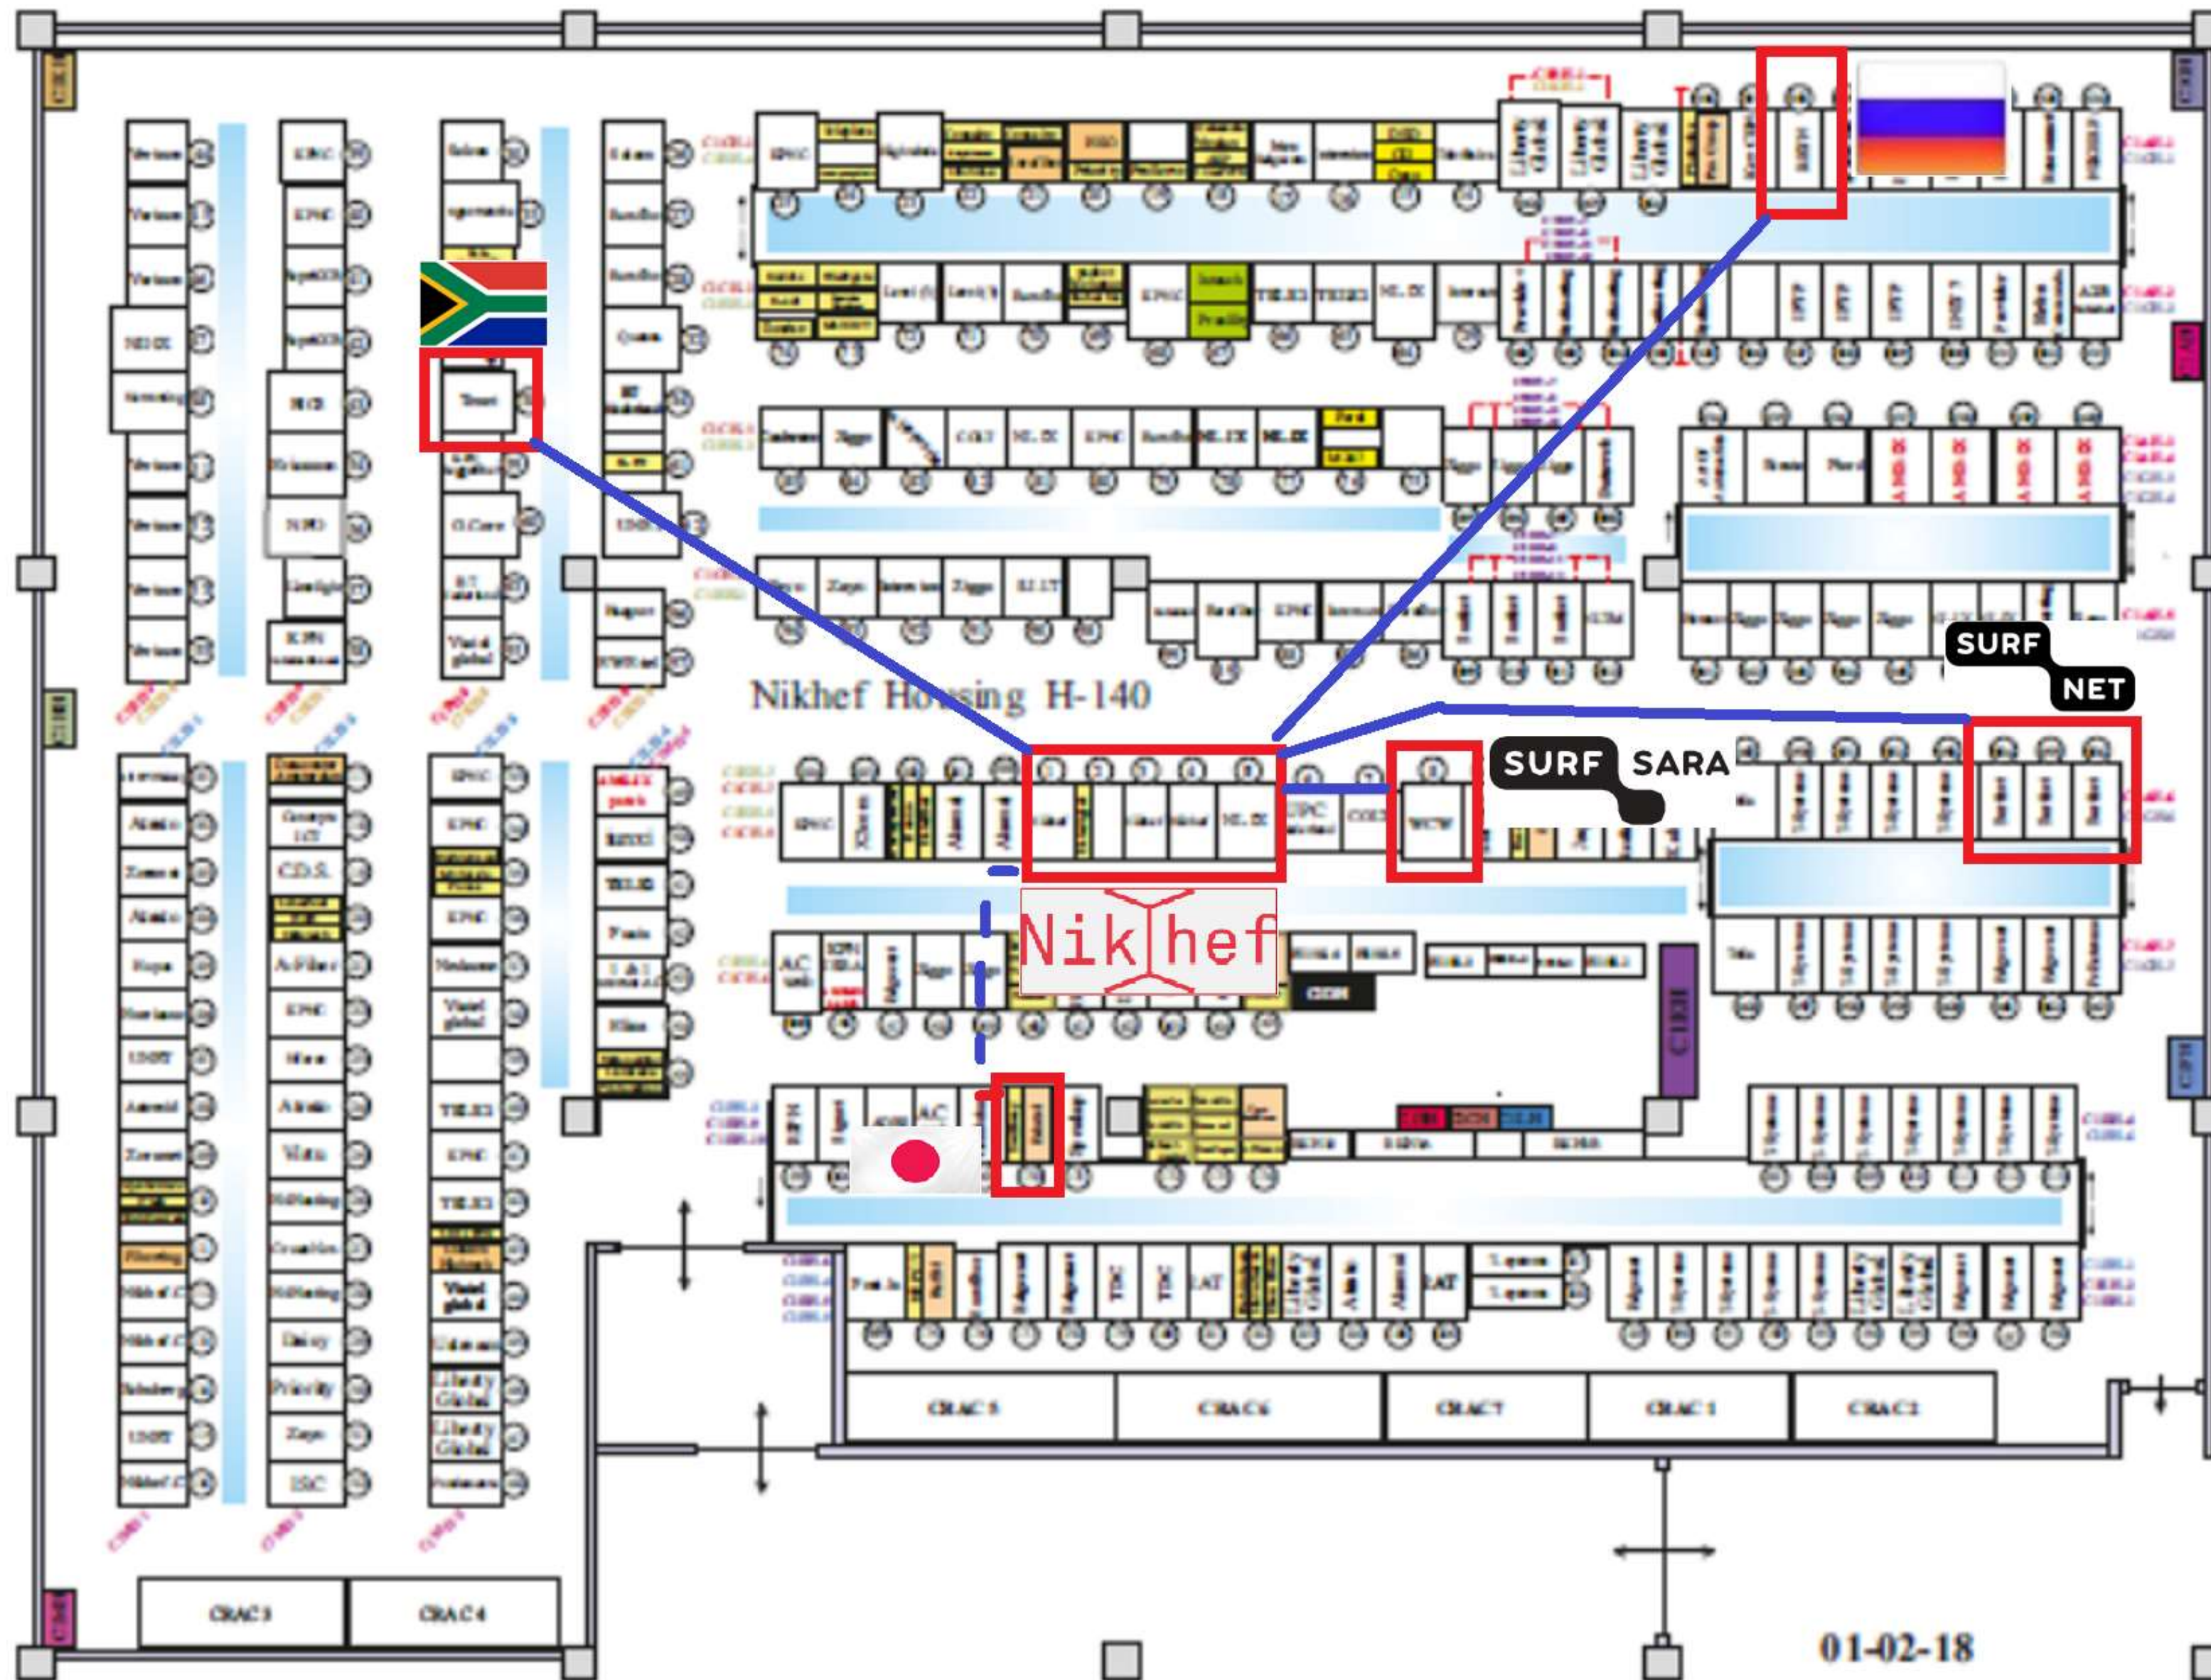

Nikhef
Data Processing
Facility

330 Gbps – 1200 Gbps

~180 networks, 33 carriers

2.5 MW redundant power, A+B feed

*Data Processing Facility (400 kW)
high-power ~9kW/rack, 24 C*

Housing facility ~4kW/rack, ~18 C

many energy optimization methods ...

*~21% additional power needed for cooling
surplus heat (3500 GJoule/yr, ~112 kW-yr)
linked to student housing via an STES*
