

Parameters**Figures**

Coolant

Demineralised water

Demineralised water flow rate

9.7 m³/hPressure drop (inside the detector
and distribution line)

1.5 bar

Cooling temperature (in/out)

19°C/21°C

Heat dissipation

22.5 kW

Number of transfer lines

1

Number of distribution lines

12

Transfer pipe diameter

DN50

Distribution line diameter

DN15

Flow rate / distribution line

0.85 m³/h ΔT inside the detector

2 K

Mixed water

- Flow rate max
- Pipe diameter

4 m³/h

DN32
